

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, NMFS preliminarily finds that the total marine mammal take from the proposed activity will have a negligible impact on all affected marine mammal species or stocks.

Unmitigable Adverse Impact Analysis and Determination

Impacts to subsistence uses of marine mammals resulting from the proposed action are not anticipated. The closest active acoustic source within the study area is approximately 145 mi (233 km) from land, outside of known subsistence use areas. Based on this information, NMFS has preliminarily determined that there will be no unmitigable adverse impact on subsistence uses from ONR's proposed activities.

Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the NMFS Alaska Regional Office (AKR), whenever we propose to authorize take for endangered or threatened species.

NMFS is proposing to authorize take of ringed seals and bearded seals, which are listed under the ESA. The Permits and Conservation Division has requested initiation of section 7 consultation with the Protected Resources Division of AKR for the issuance of this IHA. NMFS will conclude the ESA consultation prior to reaching a determination regarding the proposed issuance of the authorization.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue an IHA to ONR for conducting Arctic Research Activities in the Beaufort and Chukchi Seas, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed IHA can be found at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>.

Request for Public Comments

We request comment on our analyses, the proposed authorization, and any other aspect of this Notice of Proposed IHA for the proposed action. We also request at this time comment on the potential renewal of this proposed IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform decisions on the request for this IHA or a subsequent Renewal.

On a case-by-case basis, NMFS may issue a one-year IHA renewal with an additional 15 days for public comments when (1) another year of identical or nearly identical activities as described in the Specified Activities section of this notice is planned or (2) the activities as described in the Specified Activities section of this notice would not be completed by the time the IHA expires and a second IHA would allow for completion of the activities beyond that described in the Dates and Duration section of this notice, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to expiration of the current IHA;
- The request for renewal must include the following:

(1) An explanation that the activities to be conducted under the requested Renewal are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (*e.g.*, reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take because only a subset of the initially analyzed activities remain to be completed under the Renewal); and

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

- Upon review of the request for Renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

SUPPLEMENTARY INFORMATION:

Title of Collection: Trail Disclosure Policy.

OMB Control Number: 3170-0039.

Type of Review: Extension with change of a currently approved collection.

Affected Public: Business or other for profit institutions.

Estimated Number of Respondents: 10.

Estimated Total Annual Burden Hours: 100.

Abstract: In subsection 1032(e) of the Dodd-Frank Act, 12 U.S.C. 5532(e), Congress gave the Bureau authority to provide certain legal protections to companies to conduct trial disclosure programs. This authority can be used to help further the Bureau's statutory objective, stated in subsection 1021(b)(5) of the Act, to "facilitate access and innovation" in the "markets for consumer financial products and services." More specifically, under section 1032(e), the Bureau may permit covered persons to conduct trial disclosure programs, limited in time and scope, for the purpose of providing trial disclosures designed to improve upon required disclosures. Such permission may include providing a legal safe harbor; *i.e.*, the Bureau may deem a covered person conducting such a program to be in compliance with, or exempt from, a requirement of a rule or enumerated consumer law. Such trial disclosure programs must be subject to standards and procedures that are designed to encourage covered persons to conduct such programs. The requested information will provide a basis for assessing eligibility to conduct trial disclosure programs. The information will also serve to identify trial disclosure programs that carry the potential for developing and verifying disclosure improvements, while controlling for risks to consumers.

Request for Comments: The Bureau issued a 60-day **Federal Register** notice on May 13, 2019 (84 FR 20864), Docket Number: CFPB-2019-0026. Comments were solicited and continue to be invited on: (a) Whether the collection of information is necessary for the proper

performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be reviewed by OMB as part of its review of this request. All comments will become a matter of public record.

Dated: July 25, 2019.
