SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Multiple Worksite Report and the Report of Federal Employment and Wages information collection. States use the Multiple Worksite Report to collect employment and wages data from non-Federal businesses engaged in multiple operations within a State and subject to State Unemployment Insurance laws. The Report of Federal Employment and Wages is designed for Federal establishments covered under the Unemployment Compensation for Federal Employees program. These data are used for sampling, benchmarking, and economic analysis. BLS Authorizing Statute sections 1 and 2 and Social Security Act section 303 authorize this information collection. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing NUREG-2214 (ADAMS Accession No. ML19214A111) to provide a technical basis for the staff's safety review of aging degradation mechanisms and aging management programs in renewal applications for specific ISFSI licenses and certificates of compliance of spent fuel dry storage systems.

NUREG-2214 evaluates aging degradation mechanisms to determine if they could affect the ability of dry storage system components to fulfill their safety functions in the period of extended operation. The guidance also provides examples of aging management programs that are considered generically acceptable to address the credible aging mechanisms to ensure that the design bases of dry storage systems will be maintained.

II. Additional Information

The staff considered public comments received on the draft report in preparing the final NUREG. The NRC published a notice of the availability of the draft report for comment on October 24, 2017 (82 FR 49233). The public comment period closed on December 26, 2017. The public comments and staff responses are available in ADAMS under Accession No. ML19072A016.

III. Regulatory Analysis

The NRC has prepared a final regulatory analysis on this action. The analysis examines the costs and benefits of the alternatives considered by the NRC. The regulatory analysis is available in ADAMS under Accession No. ML19130A192.

IV. Backfitting and Issue Finality Provisions

NUREG-2214 provides guidance to the NRC staff for the safety review of aging degradation mechanisms and aging management programs in renewal applications for specific ISFSI licenses and certificates of compliance of spent fuel dry storage systems. The issuance of this NUREG would not constitute backfitting as defined in the backfitting provisions in section 72.62 of title 10 of the *Code of Federal Regulations* (10 CFR), which are applicable to specific ISFSI licensees. Issuance of the NUREG would also not constitute backfitting under 10 CFR 50.109, or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52, which are applicable to general ISFSI licensees using the certificates of compliance. The NRC's position is based upon the following considerations.

1. The NUREG positions do not constitute backfitting, inasmuch as the NUREG is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.

The NUREG provides guidance to the staff on how to review an application for the NRC's regulatory approval in the form of licensing. The issuance of internal staff guidance is not a matter for which ISFSI applicants or general ISFSI licensees using certificates of
