SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 9, 2019 (84 FR 32749), FDA published a notice of public meeting and request for comment with a 30-day comment period to request comments on the use of complex adaptive and other novel investigation designs, data from foreign countries, real world evidence, and biomarkers and surrogate endpoints in animal drug development and regulatory decision making. Comments are intended to support FDA guidance development as required under section 305 of the Animal Drug and Animal Generic Drug User Fee Amendments of 2018 (Pub. L. 115–234). Section 305 directs FDA to develop guidance to address several alternative approaches in clinical investigations for new animal drugs.

The Agency has received a request for a 30-day extension of the comment period for the notice of meeting. The request conveyed concern that the current 30-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to alternative approaches in clinical investigations for new animal drugs.

FDA has considered the request and is extending the comment period for the notice of public meeting for 30 days, until September 16, 2019. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments without significantly delaying the development of guidance on these important issues.

Dated: August 7, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.
