DATES: This system will become effective upon its publication in today's **Federal Register**, with the exception of the routine uses which will be effective on September 20, 2019. SUPPLEMENTARY INFORMATION: FRTIB proposes to establish a new system of records entitled, "FRTIB-21, Identity, Credential and Access Management (ICAM)." ICAM manages digital identities, credentials, and access controls for FRTIB applications and

systems. ICAM is necessary to vet potential users; link employees and contractors to digital identity accounts; provision and de-provision accounts and access; and to monitor identity credentials, access to systems and data, and related risks. The proposed system of records implements ICAM capabilities across all FRTIB IT systems.

ICAM supports the following seven key functions of the ICAM Framework as defined by the Federal Chief Information Officer (CIO) Council: digital identity, credentialing, authentication, cryptography, auditing and reporting, authorization and access, and privilege management. FRTIB's ICAM's capabilities are also aligned with the Federal CIO Council's Federal Identity, Credential, and Access Management (FICAM) procedures, available at, https://www.idmanagement.gov/wp-content/uploads/sites/1171/uploads/FICAM_Roadmap_and_Implem_Guid.pdf. FRTIB proposes to apply thirteen routine uses to FRTIB-21.
