SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior (DOI), Office of the Special Trustee for American Indians (OST) maintains the Individual Indian Money (IIM) Trust Fund—Interior, OS-02 system of records. This system assists OST in meeting the fiduciary responsibilities set forth in the American Indian Trust Fund Management Reform Act of 1994, including management of the receipt, investment, disbursement and administration of money held in trust for individual Indians and Alaskan Natives (or their heirs), and Indian Tribes. The OST provides trust services and information for Indian trust funds program management and oversees the implementation of trust reforms, trust accounting and coordination of trust policies intra-bureau-wide related to the management of Indian trust funds and assets. The system also provides litigation support by analyzing and reconciling the historical collection, distribution, and disbursement of income from IIM accounts, Indian trust land, and other revenue sources. The system also supports DOI land consolidation activities of fractionated lands and annual tribal trust evaluations for Tribes who compact trust programs, functions, services, and activities under Public Law 93-638 Self-Governance Compacts on behalf of the Secretary of the Interior.

OST is publishing this revised notice to (1) update the system location, (2) propose new and modified routine uses, (3) update the categories of records and categories of individuals covered by the system, and (4) provide general and

administrative updates to remaining sections to accurately reflect the management and scope of the system in accordance with the Office of Management and Budget (OMB) Circular A-108, "Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act."

OST is proposing to modify existing routine uses to provide clarity and transparency, and reflect updates consistent with standard DOI routine uses. Routine uses A, B, G and L have been modified to provide additional clarification on external organizations and circumstances where disclosures are proper and necessary to facilitate the management of the IIM system. Routine use A was modified to further clarify disclosures to the Department of Justice or other Federal agencies when necessary in relation to litigation or judicial proceedings. Routine use B was modified to clarify disclosures to a congressional office to respond to or resolve an individual's request made to that office. Routine use G facilitates sharing with other government and tribal organizations pursuant to a court order or discovery request. Modified routine use L was revised to separate the sharing of information with the Department of the Treasury to recover debts owed to the United States into new proposed routine use W to distinguish the purpose of the sharing of information and promote greater transparency. Modified routine use I and new routine use J allow DOI to share information with appropriate Federal agencies or entities when reasonably necessary to respond to a breach of personally identifiable information and to prevent, minimize, or remedy the risk of harm to individuals or the Federal Government, or assist an agency in locating individuals affected by a breach in accordance with OMB Memorandum M-17-12, "Preparing for and Responding to a Breach of Personally Identifiable Information."

OST is proposing new routine uses to facilitate the sharing of information with agencies and organizations to ensure the efficient and effective management of the IIM system, or to carry out a statutory responsibility of the DOI or Federal Government. Proposed routine use V facilitates sharing of information with the Executive Office of the President to resolve issues concerning an individual's records when requested by the subject individual. Proposed routine use W allows sharing of information with the Department of the Treasury to recover debts owed to the United States.

II. Privacy Act

The Privacy Act of 1974, 5 U.S.C. 552a, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information about an individual is retrieved by the name or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of the DOI by complying with DOI Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Records Access, Contesting Record, and Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains and the routine uses of each system. The revised Individual Indian Money Trust Funds system of records notice is published in its entirety below. In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

Computer servers on which electronic records are stored are located in secured DOI controlled facilities with physical, technical and administrative levels of security to prevent unauthorized access to the DOI network and information assets. Access granted to authorized personnel is password-protected, and each person granted access to the system must be individually authorized to use the system. A Privacy Act Warning Notice appears on computer monitor screens when records containing information on individuals are first displayed. Data exchanged between the servers and the system is encrypted. Backup tapes are encrypted and stored in a locked and controlled room in a secure, off-site location.

Computerized records systems follow the National Institute of Standards and Technology standards as developed to comply with the Privacy Act of 1974, 5 U.S.C. 552a, Paperwork Reduction Act of 1995, 44 U.S.C. 3501-3521; Federal Information Security Modernization Act of 2014, 44 U.S.C. 3551-3558; and the Federal Information Processing Standards 199; Standards for Security Categorization of Federal Information

Such security measures establish different access levels for different types of users associated with pre-defined groups and/or bureaus. Each user's access is restricted to only the functions and data necessary to perform that person's job responsibilities. Access can be restricted to specific functions (*i.e.*, create, update, delete, view, assign permissions) and is restricted utilizing role-based access. Authorized users are required to follow established internal security protocols and must complete all security, privacy, and records management training and sign the DOI Rules of Behavior. Contract employees with access to the system are monitored by the Contracting Officer's Representative and agency Security Manager. A Privacy Impact Assessment was conducted to ensure that Privacy Act safeguard requirements are met and appropriate privacy controls and safeguards are in place.
