SUPPLEMENTARY INFORMATION:*I. Abstract*

This request is for extension of a currently approved information collection.

In 2016, NMFS implemented this collection of information under Amendment 113 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands (BSAI) Management Area. Amendment 113 modified management of the BSAI Pacific cod fishery to set aside a portion of the Aleutian Islands (AI) Pacific cod total allowable catch for harvest by vessels directed fishing for AI Pacific

cod and delivering their catch for processing to a shoreside processor located on land west of 170° W longitude in the Aleutian Islands ("Aleutian Islands shoreplant"). This harvest set-aside applies only if specific notification and performance requirements are met, and only during the first few months of the fishing year. This harvest set-aside provides the opportunity for vessels, Aleutian Islands shoreplants, and the communities where Aleutian Islands shoreplants are located to receive benefits from a portion of the Aleutian Islands Pacific cod fishery. The notification and performance requirements preserve an opportunity for the complete harvest of the BSAI Pacific cod resource if the set-aside is not fully harvested.

This collection of information contains the annual notification of intent that the City of Adak or the City of Atka submits to NMFS of its intent to process Aleutian Islands Pacific cod in the upcoming fishing year in order for the Bering Sea Trawl Catcher Vessel A-Season Sector Limitation and the Aleutian Islands Catcher Vessel Harvest Set-Aside to go into effect in the upcoming fishing year. The City Manager of Adak or the City Administrator of Atka is required to provide NMFS with the annual notification of intent no later than October 31 for the harvest set-aside to go into effect in the upcoming year.

In March 2019, the U.S. District Court for the District of Columbia vacated the rule implementing Amendment 113 and remanded Amendment 113 to NMFS for reconsideration. In May 2019, the U.S. Department of Justice filed a notice of appeal.

As the annual notification of intent is based on the vacated regulations that implemented Amendment 113, this information will not be collected unless the regulations are reinstated on appeal.

NMFS is requesting renewal of this collection of information in the event of a successful appeal.

II. Method of Collection

The City Manager of Adak or the City Administrator of Atka submits a letter or memorandum to NMFS indicating that the community he or she represents intends to process Aleutian Islands Pacific cod. This notification of intent must be submitted annually by certified mail through the U.S. Postal Service and postmarked no later than October 31. It may also be emailed to ensure that NMFS has received notification prior to November 1. Email notification is optional and in addition to notification via the U.S. Postal Service; email does

not replace the U.S. Postal Service notification requirement.

Determination of Overfishing or an Overfished Condition

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: This action serves as a notice that NMFS, on behalf of the Secretary of

Commerce (Secretary), has found that the northern subpopulation of Pacific sardine is now overfished. NMFS, on behalf of the Secretary, notifies the appropriate regional fishery management council (Council) whenever it determines that overfishing is occurring, a stock is in an overfished condition, or a stock is approaching an overfished condition.

FOR FURTHER INFORMATION CONTACT: Regina Spallone, (301) 427-8568.

SUPPLEMENTARY INFORMATION: Pursuant to section 304(e)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2), NMFS, on behalf of the Secretary, must notify Councils, and publish in the **Federal Register**, whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

NMFS has determined that the northern subpopulation of Pacific sardine is now overfished. The most recent assessment for Pacific sardine, finalized in 2019, using data through 2018 and estimating a stock size on July 1, 2019, indicates that the stock is overfished because the biomass is projected to be less than the minimum stock size threshold. NMFS has informed the Pacific Fishery Management Council that it must develop a rebuilding plan for this stock.

Authority: 16 U.S.C. 1854 *et seq.*

Dated: August 20, 2019.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
