In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

Abstract: The Disinfectants/Disinfection Byproducts, Chemical, and Radionuclides Rules ICR examines public water system and primacy agency burden and costs for recordkeeping and reporting requirements in support of the disinfectants/disinfection byproducts, chemical, and radionuclides regulations promulgated under the Safe Drinking Water Act. These recordkeeping and reporting requirements are mandatory for compliance with 40 CFR parts 141 and 142. The following regulations are included: The Stage 1 Disinfectants and Disinfection Byproducts Rule (Stage 1 DBPR), the Stage 2 Disinfectants and Disinfection Byproducts Rule (Stage 2 DBPR), the Chemical Phase Rules (Phases II/III/V), the Radionuclides Rule, the Disinfectant Residual Monitoring and Associated Activities under the Surface Water Treatment Rule (SWTR), the Arsenic Rule, and the Lead and Copper Rule (LCR), including the Lead and Copper Rule Short Term Revisions.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are public water systems and primacy agencies.

Respondent's obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.

Estimated number of respondents: 146,772 (total).

Frequency of response: Varies by requirement (*i.e.*, on occasion, monthly, quarterly, semi-annually, and annually).

Total estimated burden: 5,161,356 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$455,885,000 (per year), which includes \$252,952,000 annualized capital or operation and maintenance costs.

Changes in the Estimates: There is a decrease of 144,340 hours in the total estimated respondent burden compared with the ICR currently approved by the OMB. This is due to a reduction in public water system inventory.

Abstract: The Emission Guidelines for Existing Commercial and Industrial Solid Waste Incineration Units (40 CFR part 60, subpart DDDD) fulfill the requirements of sections 111 and 129 of the Clean Air Act (CAA), and affect the administrator of an air quality program in a state or United States protectorate with one or more existing commercial and industrial solid waste incineration (CISWI) units. These regulations apply to sources commencing construction on or before June 4, 2010 or to sources commencing modification or reconstruction between June 1, 2001 and August 7, 2013. The guidelines do not apply directly to CISWI unit owners and operators, since they are implemented through state implementation plans (SIP). If a state does not develop, adopt, and submit an approved state plan, or if a state's plan is not approved, the EPA must promulgate a Federal implementation plan to implement the emission guidelines in a state without its own SIP. This information is being collected to assure compliance with 40 CFR part 60, subpart DDDD.

In general, all emission guidelines standards require initial notification reports, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the emission guidelines.
