[EPA-R05-OAR-2017-0700; FRL-9999-33-Region 5]

**Air Plan Approval; Indiana; Regional Haze Plan and Prong 4 (Visibility) for the 2006 and 2012 PM<sub>2.5</sub>, 2010 NO<sub>2</sub>, 2010 SO<sub>2</sub>, and 2008 Ozone NAAQS**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is taking action under the Clean Air Act (CAA) on Indiana’s November 27, 2017 State Implementation Plan (SIP) submittal addressing regional haze. This action is based on EPA’s previous determination that a state’s implementation of the Cross-State Air Pollution Rule (CSAPR) program continues to meet the criteria of the Regional Haze Rule (RHR) to qualify as an alternative to the

application of Best Available Retrofit Technology (BART). EPA is taking several related actions. First, EPA is approving the portion of Indiana’s November 27, 2017 SIP submittal seeking to change reliance from the Clean Air Interstate Rule (CAIR) to CSAPR for certain regional haze requirements. EPA is also converting EPA’s limited approval/limited disapproval of Indiana’s regional haze SIP to a full approval and withdrawing the Federal Implementation Plan (FIP) provisions that address the limited disapproval. Finally, EPA is approving the visibility prong (“prong 4”) of Indiana’s infrastructure SIP submittals for the 2006 24-hour and 2012 annual fine particulate matter (PM<sub>2.5</sub>), 2010 nitrogen dioxide (NO<sub>2</sub>), and 2010 sulfur dioxide (SO<sub>2</sub>) National Ambient Air Quality Standards (NAAQS) and converting EPA’s disapproval of the visibility portion of Indiana’s infrastructure SIP submittal for the 2008 ozone NAAQS to an approval.

**DATES:** This final rule is effective October 7, 2019.

**ADDRESSES:** EPA has established a docket for this action under Docket ID No. EPA-R05-OAR-2017-0700. All

documents in the docket are listed in the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through <http://www.regulations.gov> or at the EPA Region 5 office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for availability information).

**FOR FURTHER INFORMATION CONTACT:** Kathleen D’Agostino, Environmental Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-1767, [dagostino.kathleen@epa.gov](mailto:dagostino.kathleen@epa.gov).

**SUPPLEMENTARY INFORMATION:** Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

- I. Background
- II. What comments did EPA receive on the proposed rule?
- III. What action is EPA taking?
- IV. Statutory and Executive Order Reviews

## I. Background

On May 22, 2019 (84 FR 23504), EPA proposed to approve Indiana's November 27, 2017 SIP revision, including full approval of Indiana's Regional Haze SIP, the removal of the Regional Haze FIP, and the approval of prong 4 elements. The specific details of Indiana's November 27, 2017 SIP revision and the rationale for EPA's approval are discussed in the notice of proposed rulemaking and will not be restated here.

Indiana submitted infrastructure SIPs for the following NAAQS: 2006 24-hour PM<sub>2.5</sub> (October 20, 2009, June 25, 2012, July 12, 2012, and May 22, 2013); 2012 annual PM<sub>2.5</sub> (December 10, 2016); 2010 NO<sub>2</sub> (January 15, 2013); 2010 SO<sub>2</sub> (May 22, 2013); and 2008 ozone (December 12, 2011), which relied on the State having a fully approved regional haze SIP to satisfy its prong 4 requirements. However, EPA had not fully approved Indiana's regional haze SIP, as the Agency issued a limited disapproval of the State's original regional haze plan on June 7, 2012 (77 FR 33642), due to the plan's reliance on CAIR. EPA finalized a limited approval of Indiana's regional haze SIP on June 11, 2012 (77 FR 34218), as meeting the remaining applicable regional haze requirements set forth in the CAA and the RHR.

In the June 7, 2012 limited disapproval action, EPA also amended the RHR to provide that participation by a state's electric generating units (EGUs) in a CSAPR trading program for a given pollutant—either a CSAPR Federal trading program implemented through a CSAPR FIP or an integrated CSAPR state trading program implemented through an approved CSAPR SIP revision—qualifies as a BART alternative for those EGUs for that pollutant. On September 29, 2017 (82 FR 45481), EPA published a final rule affirming the continued validity of the Agency's 2012 determination that participation in CSAPR meets the RHR's criteria for an alternative to the application of source specific BART. On November 27, 2017, to correct the deficiencies in its regional haze SIP and obtain approval of the portions of the aforementioned infrastructure SIPs that rely on the regional haze SIP, Indiana submitted a SIP revision to replace reliance on CAIR with reliance on CSAPR.

In this final action, EPA is approving Indiana's November 27, 2017 regional haze SIP revision and converting EPA's

previous limited approval/limited disapproval of Indiana's regional haze SIP to a full approval. Specifically, EPA finds that Indiana's November 27, 2017, SIP revision satisfies the SO<sub>2</sub> and NO<sub>x</sub> BART requirements of the RHR for the BART-eligible sources in Indiana subject to the CSAPR annual NO<sub>x</sub>, annual SO<sub>2</sub>, and ozone season NO<sub>x</sub> trading programs.<sup>1</sup> For reasons more fully explained in the proposal, and consistent with EPA's 2013 guidance on the prong 4 element of infrastructure SIPs,<sup>2</sup> with this approval of Indiana's regional haze SIP revision, the State's regional haze SIP is now fully approved and, therefore, provides the measures needed to ensure that its emissions do not interfere with any other state's efforts to protect visibility. Therefore, EPA is also approving the prong 4 portion of Indiana's 2006 24-hour PM<sub>2.5</sub> submissions, 2012 annual PM<sub>2.5</sub> submission, 2010 SO<sub>2</sub> submission, and 2010 NO<sub>2</sub> submission, as well as converting EPA's disapproval of the prong 4 portion of Indiana's 2008 ozone infrastructure submission (*see* 81 FR 53309), to an approval.

## II. What comments did EPA receive on the proposed rule?

EPA provided a 30-day comment period for the May 22, 2019, proposed rule. During the comment period, we received one anonymous comment objecting to the proposed action. The adverse comment is summarized and addressed below.

*Comment:* EPA can't support finalizing action on infrastructure elements that are based on a FIP. CAA section 110(a)(2)(D) states that SIPs shall "contain adequate provisions . . . ." This language means that the requirements under section 110(a)(2)(D) must be contained in the SIP and can't be met by a FIP. EPA should disapprove Indiana's infrastructure SIP.

*Response:* The commenter's premise is incorrect in that the State of Indiana is meeting its prong 4 obligations through a fully approved regional haze SIP, not a FIP. The prong 4

infrastructure SIP element addressed in this action is contained in Section 110(a)(2)(D)(i)(II), which requires a state's implementation plan to contain provisions prohibiting sources in that state from emitting pollutants in amounts that interfere with any other state's efforts to protect visibility under part C of the CAA. EPA issued guidance on infrastructure SIPs in a September 13, 2013 memorandum from Stephen D. Page, titled, "Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and 110(a)(2)" (2013 Guidance). The 2013 Guidance lays out how a state's infrastructure SIP may satisfy prong 4. EPA explained that one way a state may satisfy prong 4 is via confirmation that the state has a fully approved regional haze SIP.

EPA's RHR, codified at 40 CFR 51.308 and 51.309, specifically requires that a state participating in a regional planning process include all measures needed to achieve its apportionment of emission reduction obligations agreed upon through that process. A fully approved regional haze SIP will ensure that emissions from sources under an air agency's jurisdiction are not interfering with measures required to be included in other air agencies' plans to protect visibility. The RHR further specifies that participation by a state's EGUs in a CSAPR trading program for a given pollutant—either a CSAPR Federal trading program implemented through a CSAPR FIP or an integrated CSAPR state trading program implemented through an approved CSAPR SIP revision—qualifies as a BART alternative for those EGUs for that pollutant. *See* 40 CFR 51.308(e)(4). Therefore, consistent with the RHR and the 2013 Guidance, a state's regional haze SIP can be fully approved if a state is meeting the BART requirement through the implementation of a CSAPR FIP. In this case, Indiana has replaced its former reliance on CAIR with a new SIP that relies on CSAPR to meet certain outstanding regional haze requirements. EPA is approving that SIP in this action and is withdrawing the FIP it had previously promulgated for Indiana to provide for reliance on CSAPR (*see* 77 FR 33654). Whether a state is subject to a CSAPR FIP or has replaced that FIP with a SIP to satisfy its obligations under prongs 1 and 2 of section 110(a)(2)(D)(i)(I) (together generally known as the "good neighbor provision") is not relevant to the question at hand regarding *prong 4* obligations. Indiana has appropriately adjusted its regional haze SIP to rely on CSAPR to meet certain regional haze

<sup>1</sup> On December 17, 2018 (83 FR 64472), EPA approved Indiana's regulations requiring large Indiana EGUs to participate in new CSAPR state trading programs for annual NO<sub>x</sub>, annual SO<sub>2</sub>, and ozone season NO<sub>x</sub> emissions integrated with the CSAPR Federal trading programs and replaced the corresponding FIP requirements. Indiana's State trading program rules, 326 IAC 24–5 (Nitrogen Oxides (NO<sub>x</sub>) Annual Trading Program), 326 IAC 24–6 (Nitrogen Oxides (NO<sub>x</sub>) Ozone Season Group 2 Trading Program), and 326 IAC 24–7 (Sulfur Dioxide (SO<sub>2</sub>) Group 1 Trading Program), are codified into the SIP at 40 CFR 52.770(c).

<sup>2</sup> September 13, 2013 memorandum from Stephen D. Page titled "Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and 110(a)(2)."

obligations, and this is what allows EPA to fully approve the State's regional haze SIP. Having a fully approved regional haze SIP, as recognized in the 2013 Guidance, allows EPA to conclude that the State's prong 4 obligations are therefore also met.

Regardless, contrary to commenter's assertion, the State has in fact also already replaced its CSAPR FIP with a CSAPR SIP. On December 17, 2018, EPA approved Indiana's State CSAPR trading program regulations for annual NO<sub>x</sub>, annual SO<sub>2</sub>, and ozone season NO<sub>x</sub> emissions to replace EPA's Federal CSAPR trading program regulations for these emissions from Indiana units (83 FR 64472). We found that Indiana's trading program is integrated with and is substantively identical to the Federal trading program. Therefore, EPA's full approval of Indiana's regional haze SIP, which provides the basis of EPA's approval of Indiana's prong 4 elements, relies on the State's integrated CSAPR state trading program, not a FIP as commenter asserts.

### III. What action is EPA taking?

EPA is taking the following actions: (1) Approving the portion of Indiana's November 27, 2017 SIP submittal seeking to change from reliance on CAIR to reliance on CSAPR for certain regional haze requirements; (2) converting EPA's limited approval/limited disapproval of Indiana's January 14, 2011 and March 10, 2011 regional haze SIP to a full approval; (3) withdrawing the FIP provisions that address the limited disapproval; (4) approving the visibility prong of Indiana's infrastructure SIP submittals for the 2012 and 2006 PM<sub>2.5</sub>, 2010 NO<sub>2</sub>, and 2010 SO<sub>2</sub> NAAQS; and (5) converting EPA's disapproval of the visibility portion of Indiana's infrastructure SIP submittal for the 2008 ozone NAAQS to an approval.

### IV. Statutory and Executive Order Reviews

#### A. Executive Orders 12866 and 13563: Regulatory Planning and Review

This action is not a "significant regulatory action" under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011).

#### B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is an Executive Order 13771 regulatory action because this

action is not significant under Executive Order 12866.

#### C. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

#### D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities.

#### E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, will result from this action.

#### F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

#### G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175. It will not have substantial direct effects on tribal governments. There are no Indian reservation lands in Indiana. Thus, Executive Order 13175 does not apply to this rule.

#### H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of "covered regulatory action" in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

#### I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

#### J. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards. Therefore, the EPA is not considering the use of any voluntary consensus standards.

#### K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994).

#### L. Determination Under Section 307(d)

Pursuant to CAA section 307(d)(1)(B), this action is subject to the requirements of CAA section 307(d), as it revises a FIP under CAA section 110(c).

#### M. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

#### N. Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 5, 2019. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and

shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See CAA section 307(b)(2).

**EPA–R07–OAR–2019–0315; FRL–9998–90–Region 7]**

**Air Plan Approval; Missouri; Compliance Monitoring Usage**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is taking final action to approve a Missouri State Implementation Plan (SIP) revision submission received on February 15, 2019. The submission revises a Missouri SIP approved regulation that establishes alternate monitoring methods for

certifying compliance and alternate methods to establish whether a violation has occurred at a source. These revisions are administrative in nature and do not impact the stringency of the SIP or air quality. Approval of these revisions will ensure consistency between state and federally-approved rules. The EPA’s approval of this rule revision is being done in accordance with the requirements of the Clean Air Act (CAA).

**DATES:** This final rule is effective on October 7, 2019.

**ADDRESSES:** The EPA has established a docket for this action under Docket ID No. EPA–R07–OAR–2019–0315. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on

the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov> or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information.

**FOR FURTHER INFORMATION CONTACT:** Tracey Casburn, Environmental Protection Agency, Region 7 Office, Air Quality and Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number (913) 551–7016; email address [casburn.tracey@epa.gov](mailto:casburn.tracey@epa.gov).
