Information Collection Request Title:

U.S. Government Feed the Future Initiative Audience Segmentation Survey.

Abstract: The “USAID National Survey of U.S. Adults about Global Food Security” is a 20-minute nationally-representative survey of U.S. adults conducted for USAID by a professional research company. The purpose of the research is to inform the communications strategy, education, and outreach efforts for the Feed the Future Initiative. The research contractor will gather information and feedback by telephone and online from 1,000 voluntary adult participants using a nationally representative survey sampling method. Using the information collected in the survey, the research

consultant will measure opinions about global food security and hunger, program awareness, reasons for improving global food security and reducing hunger, questions and concerns about the initiative, as well as consumer segments and insights for each segment to more effectively hone communication, education and outreach efforts.

Likely Respondents: This study includes one respondent group, U.S. adults 18 years and older living in the fifty states and the District of Columbia.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions and survey screening criteria; to develop, acquire, install and utilize technology and systems for the purpose of providing opinions and feedback; to be able to respond to and complete the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated are summarized in the table below.

Abstract of Proposed Collection

USAID collects information from individuals and organizations to

conduct screening to help ensure that USAID funds, USAID-funded activities, or other resources will not be used to provide support to entities or individuals deemed to be a risk to national security.

USAID vets prospective awardees seeking funding from USAID to mitigate the risk that such funds might benefit entities or individuals who present a national security risk. To conduct vetting, USAID collects information from prospective awardees and subawardees regarding their directors, officers, and/or key employees. The information collected is compared to information gathered from commercial, public, and U.S. government databases to determine the risk that the applying organization or individual might use Agency funds or programs in a way that presents a threat to national security.

Methodology

USAID collects information via mail or electronic submission.
