AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a final decision on a UIC no migration petition reissuance.

SUMMARY: Notice is hereby given that a reissuance of an exemption to the Land Disposal Restrictions, under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act, has been granted to TMDPS for three Class I hazardous waste injection wells located at their Deer Park, Texas facility. identified in this exemption reissuance request, into Class I hazardous waste injection wells WDW-169, WDW-249 and WDW-422 until December 31, 2030, unless the EPA moves to terminate this exemption. Proposed Settlement Agreement, Challenge to Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended ("CAA" or the "Act"), notice is hereby given of a proposed settlement agreement to resolve petitions for review filed by United States Steel Corporation ("U.S. Steel") with respect to U.S. Steel's Minntac taconite facility, involving several actions taken by EPA with regard to nitrogen oxide (NO_x) emission limits for Minntac. On November 29, 2013, June 13, 2016, and February 1, 2018, U.S. Steel filed petitions in the United States Court of Appeals for the Eighth Circuit challenging EPA's 2013 Regional Haze (RH) Federal Implementation Plan (FIP) for Minnesota and Michigan; 2013 RH State Implementation Plan (SIP) partial disapprovals for Michigan and Minnesota; 2016 revised RH FIP for Michigan and Minnesota; and EPA's denial of U.S. Steel's petitions for reconsideration of the 2013 FIP, 2013 SIP partial disapprovals, and 2016 revised FIP. The Settlement Agreement would resolve U.S. Steel's challenges to these actions, with respect to Minntac. Under the proposed settlement agreement, the parties agree to take certain specified actions.

DATES: Written comments on the proposed settlement agreement must be received by October 11, 2019.
