SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a draft guidance for industry entitled “Reconditioning of Fish and Fishery Products by Segregation.” We are issuing the draft guidance consistent with our good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of the FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

The draft guidance is intended to help owners of fish and fishery products, or their representatives, interested in bringing adulterated products into compliance with the Federal Food, Drug, and Cosmetic Act by means of segregating non-violative product from adulterated product. Specifically, this document provides guidance on:

- Segregation based on a production-related rationale supported by production records or information identifying the cause of the adulteration along with sampling and testing to confirm that the segregation was successful; or
- segregation based on the results of statistically significant sampling and testing.

II. Electronic Access

Persons with access to the internet may obtain the draft guidance at either <https://www.fda.gov/RegulatoryInformation/Guidances/default.htm> or <https://www.regulations.gov>. Use the FDA website listed in the previous sentence to find the most current version of the guidance.

III. Paperwork Reduction Act of 1995

This draft guidance also refers to previously approved collections of information found in FDA regulations. The collections of information in 21 CFR 1.94(b) and 21 CFR 1.95(a) and (b) using Form FDA 766 have been approved under OMB control number 0910-0025.
