Abstract: The Indian Child Welfare Act (ICWA or Act), 25 U.S.C. 1901 *et seq.*, imposes certain requirements for child custody proceedings that occur in State court when a child is an “Indian child.” The regulations, primarily located in Subpart I of 25 CFR 23, provide procedural guidance for implementing ICWA, which necessarily involves information collections to determine whether the child is Indian, provide notice to the Tribe and parents or Indian custodians, and maintain records. The information collections are conducted during a civil action (*i.e.*, a child custody proceeding). While these civil actions occur in State court, and the U.S. is not a party to the civil action, the civil action is subject to the Federal statutory requirements of ICWA, which the Secretary of the Interior oversees under the Act and general authority to manage Indian affairs under 25 U.S.C. 2 and 9.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior (DOI) is creating a new system of records titled INTERIOR/DOI–20, Paleontological Resources Preservation System to implement the Paleontological Resources Preservation Act of 2009 (PRPA), which requires DOI to issue implementing regulations to manage, protect, and preserve paleontological resources on Federal lands under the jurisdiction of DOI using scientific principles and expertise. In compliance with PRPA, DOI's Bureau of Land Management (BLM), Bureau of Reclamation (Reclamation), National Park Service (NPS), and U.S. Fish and Wildlife Service (FWS) are promulgating a joint regulation for the collection of paleontological resources from the lands administered by these bureaus and are responsible for collaborating on the management of these resources. A Notice of Proposed Rulemaking was published in the

Federal Register on December 7, 2016 at 81 FR 88173 to provide notice to the public and allow comment on the proposed rule for the management, collection, and curation of paleontological resources from federal lands using scientific principles and expertise, including collection in accordance with permits; curation in an approved repository; and maintenance of confidentiality of specific locality data. A final rule implementing the DOI regulations will appear at 43 CFR part 49, Paleontological Resources Preservation. BLM, Reclamation, NPS and FWS have developed a standardized application for paleontological resources use permits. Paleontological resources are fossils or fossilized remains, traces, or imprints of organisms preserved in or on the Earth's crust that are of paleontological interest and that provide information about the history of life on earth as defined by the PRPA. The INTERIOR/DOI–20, Paleontological Resources Preservation System, system of records will assist the bureaus in managing, tracking, and reporting activities under permits, ensuring permitted activities do not interfere with management objectives for the land or with other authorized public uses; and protecting Federal land and the natural and cultural resources on that land. Sections 6306 and 6307 of the PRPA, which may be found at 16 U.S.C. 470 470aaa–5 and 470aaa–6, respectively, contain criminal and civil penalties for persons who commit prohibited acts or for violations involving paleontological resources under the PRPA and other law enforcement authorities. Any reported or suspected violation of the PRPA will be referred to the appropriate Federal, state, or local law enforcement organization for investigation and appropriate action, and any records of such investigations will not be maintained in this system. DOI records related to criminal investigations for prohibited acts or violations involving paleontological resources under the PRPA will be maintained in other law enforcement systems of records as appropriate and will not be part of this system of records. However, records relating to civil penalties assessed under the PRPA may be maintained in this system of records and other DOI systems of records as necessary to implement the provisions of the PRPA.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and

disseminate individuals' personal information. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Records Access, Contesting Record, and Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains and the routine uses of each system. The new INTERIOR/DOI–20, Paleontological Resources Preservation System, system of records is published in its entirety below. NPS has a current system of records titled, Special Use Permits—Interior, NPS—1, which is supplemented by this system of records, INTERIOR/DOI–20, Paleontological Resources Preservation System. In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Participation

You should be aware that your entire comment including your personal identifying information, such as your address, phone number, email address, or any other personal identifying information in your comment, may be made publicly available at any time. While you may request to withhold your personal identifying information from public review, we cannot guarantee we will be able to do so.

PURPOSE(S) OF THE SYSTEM:

The primary purpose of this system is to implement the PRPA, which requires DOI to issue implementation regulations to manage, protect, and preserve paleontological resources on Federal lands under the jurisdiction of DOI using scientific principles and expertise. The primary uses of the records are to provide BLM, Reclamation, NPS, and FWS with information to approve or deny requests for paleontological resources use permits. Additionally, this system of records will facilitate management, tracking, and reporting activities under permits, thus allowing bureau and office staff to ensure that permitted activities do not interfere with management objectives for the land or with other authorized public uses, thereby protecting Federal land and the natural and cultural resources on that land.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by this system include members of the public who apply for paleontological resources use permits; permittees and persons working under a permit (support personnel); persons who file a written

objection to a proposed notice of violation and assessment of civil penalty and/or request a hearing on a final assessment of civil penalty; DOI employees, contractors, or partners who perform paleontological investigations for scientific research; employees located at a facility that curate Federal collections; and DOI employees who serve as contacts for processing applications and managing permits.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains paleontological resources use permit applications; documents associated with the bureau or office decision on a permit; documents associated with the management of the permits, including records of appeals of bureau or office decisions; and other records necessary to manage the permitting process and permit-related bureau or office administrative records. The system also contains information on permit numbers, locations of the paleontological site, locality numbers, types, and purposes of the proposed activity, reports of results of permitted activities, and locations and transfers of collections made under a permit. These records may contain the following information: Names of applicants and support personnel such as other persons who conduct or oversee work under the permit; researchers; applicant institutional affiliation; applicant contact information including work mailing address, work telephone number(s), work fax number, and/or professional email address; field contact information; applicant and support personnel resumes, educational institutions attended and dates of attendance or graduation, applicant institutional affiliation, employment information, machinery or vehicle identifying information as appropriate; proof of insurance as appropriate, and other information necessary to ensure that the applicant can perform the work proposed under the permit. The system may also contain records related to the assessment of civil penalties including written notices of objection to a proposed assessment of civil penalty, written requests for a hearing on a final assessment of civil penalty, final determinations, and any correspondence or record related to the implementation of provisions related to civil penalties under the PRPA.

RECORD SOURCE CATEGORIES:

Records in this system are obtained from individuals covered by the system including applicants for and holders of permits and their support personnel, researchers, DOI employees, DOI

contractors, DOI partners, curators and staff-employed at repositories curating Federal collections.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information maintained in this system may be disclosed to authorized entities outside DOI for purposes determined to be relevant and necessary as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

(3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DOI's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

K. To another Federal agency or Federal entity, when DOI determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in:

(1) Responding to a suspected or confirmed breach; or

(2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.
