

for further consideration for leasing of BLM-administered coal.

The Action alternatives applied the coal screens (43 CFR 3420.1–4(e)) using current data and evaluates the issues identified through internal and public scoping. The Action alternatives also address the NEPA deficiencies identified by the court order associated with the application of the multiple use screen. Alternative B considers the development of air resources as a multiple use screen in accordance with the Clean Air Act. Alternative C applies an air resource multiple use screen that encompasses greenhouse gas emission criteria limited to coal development tied to existing mining areas. Based on these factors, Alternative B contains approximately 1,214,380 acres acceptable for further consideration for leasing of BLM-administered coal; and Alternative C contains approximately 158,400 acres acceptable for further consideration for leasing of BLM-administered coal.

The BLM revised the reasonable foreseeable development scenario used in the 2015 Miles City RMP using current coal production from existing mines to forecast development over the 20-year planning period. The revised scenario was applied to all alternatives.
