E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule promulgates the operating regulations or procedures for drawbridges. Normally, this action is categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

Waterway Suitability Assessment for Operations of Liquefied Hazardous Gas Terminal; Nederland, TX

AGENCY: Coast Guard, DHS.

ACTION: Notice of inquiry; request for comments.

SUMMARY: We are requesting your comments on a Letter of Intent and Preliminary Waterway Suitability Assessment we received from Sunoco Partners Marketing & Terminals to expand their existing liquefied hazardous gas (LHG) operations by increasing the number of liquefied propane and butane ship visits from approximately 120 per year to 432 ship visits per year. Additionally, they intend to expand operations to include 120 liquefied ethane ship visits per year. The Coast Guard is notifying the public of this proposed increase in LHG marine traffic on the Sabine-Neches Waterway and is soliciting comments relevant to the Coast Guard’s preparation of a Letter of Recommendation for issuance to the federal, state, or local agency with jurisdiction over the proposed facility.

II. Background and Purpose

Under 33 CFR 127.007(a), an owner or operator planning to build a new facility handling liquefied hazardous gas (LHG), or an owner or operator planning new construction to expand or modify marine terminal operations in an existing facility handling LHG, where the construction, expansion, or modification would result in an increase in the size and/or frequency of LHG marine traffic on the waterway associated with the proposed facility or modification to an existing facility, must submit a Letter of Intent (LOI) to the Captain of the Port of the zone in which the facility is or will be located. Under 33 CFR 127.007(e), an owner or operator planning such new construction or expansion of an existing facility must also file or update a Waterway Suitability Assessment (WSA) that addresses the proposed increase in LHG marine traffic in the associated waterway.

Under 33 CFR 127.009, after receiving an LOI, the Captain of the Port issues a Letter of Recommendation (LOR) as to the suitability of the waterway for LHG marine traffic to the appropriate jurisdictional authorities. The LOR is based on a series of factors listed in 33 CFR 127.009 that relate to the physical nature of the affected waterway and issues of safety and security associated with LHG marine traffic on the affected waterway.

III. Information Requested

On March 11, 2013, Sunoco Partners Marketing and Terminals, located in Nederland, TX, submitted an LOI and Preliminary WSA indicating the company's proposed plans to expand operations of an existing dock to handle liquefied hazardous gas, specifically propane and butane, with an estimated 132 vessels calling on the facility each year. On July 14, 2019, the COTP received a new LOI and an Addendum to the original WSA. The purpose of this notice is to solicit public comments on the proposed increase in LNG marine traffic on the Sabine-Neches Waterway. The Coast Guard believes that public input may be useful to the Captain of the Port Marine Safety Unit Port Arthur (COTP) with respect to validating the information provided in Sunoco's LOI

and WSA Addendum and the development of the Coast Guard's LOR. A brief summary of Sunoco's proposal is available in the docket where indicated under **ADDRESSES**.

On January 24, 2011, the Coast Guard published Navigation and Vessel Inspection Circular (NVIC) 01–2011, titled "Guidance Related to Waterfront Liquefied Natural Gas (LNG) Facilities." NVIC 01–2011 provides guidance for owners and operators seeking approval to build and operate LNG facilities. The Coast Guard will refer to NVIC 01–2011 for process information and guidance in evaluating Sunoco's WSA Addendum. NVIC 01–2011 is available in the docket where indicated under **ADDRESSES** and also on the Coast Guard's website at <https://www.dco.uscg.mil/Portals/9/DCO%20Documents/5p/5ps/NVIC/2011/NVIC%2001–2011%20Final.pdf>.
