BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2333-091-Maine]

Rumford Falls Hydro, LLC; Notice of Environmental Site Review

On September 27, 2019, Rumford Falls Hydro, LLC filed a Notice of Intent (NOI) and Pre-Application Document to re-license its 44.5-megawatt Rumford Falls Hydroelectric Project No. 2333. The Federal Energy Regulatory Commission (Commission) will conduct an environmental site review for the project on October 24, 2019. The project is located on the Androscoggin River, in Oxford County, Maine.

The environmental site review is being held to provide all stakeholders, interested in the project's future relicensing proceedings, an opportunity to view the project's facilities and surrounding areas.

Under the Commission's Integrated Licensing Process, the Commission conducts its National Environmental Policy Act (NEPA) scoping meeting within 90 days of the filing of the licensee's NOI. An environmental site review is typically held in conjunction with that scoping meeting. However, access to some project facilities may be

limited by winter weather during December of 2019 when scoping for this project is currently anticipated. For this reason, the Commission will conduct the environmental site review in October before the onset of winter; additional site reviews will not be conducted in conjunction with NEPA scoping meetings for the project in December of 2019. Therefore, we are waiving 5.8(b)(viii) of the Commission's regulations requiring an environmental site review within 30 days of issuance of a notice of commencement of proceeding to facilitate the early environmental site review. The Commission encourages all interested parties to participate in the October environmental site review to facilitate productive scoping meetings later this year. Details of the project specific environmental site review follow.

Date and Time: October 24, 2019 at 9:00 a.m.

Location: Rumford Falls Hydroelectric Project, 299 Prospect Avenue (Route 2), Rumford, Maine 04276.

Directions and Logistics

Please notify Mr. Randy Dorman of Great Lakes Hydro America at (207) 755-5605 or at randy.dorman@brookfieldrenewable.com on or before October 21, 2019, if you plan to attend the environmental site review.

If you need further logistical information or directions, please contact the Mr. Randy Dorman with the information above. All other questions regarding the environmental site review or the Commission's Integrated Licensing Process may be directed to Ryan Hansen of the Commission's staff at (202) 502-8074 or via email at: ryan.hansen@ferc.gov.

Dated: October 1, 2019.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19-509-000]

Notice of Intent To Prepare an Environmental Assessment for the Texas Eastern Transmission, LP Proposed Marshall County Mine Panel 19E Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an

environmental assessment (EA) that will discuss the environmental impacts of the Marshall County Mine Panel 19E Project involving construction and operation of facilities by Texas Eastern Transmission, LP (Texas Eastern) in Marshall County, West Virginia. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies about issues regarding the project. The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity/authorization. NEPA also requires the Commission to discover concerns the public may have about proposals. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of issues to address in the EA. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on October 31, 2019.

You can make a difference by submitting your specific comments or concerns about the project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Commission staff will consider all filed comments during the preparation of the EA.

If you sent comments on this project to the Commission *before* the opening of this docket on September 4, 2019, you will need to file those comments in Docket No. CP19-509-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would
