SUPPLEMENTARY INFORMATION:

Title and OMB Number: 2020 Election Administration and Voting Survey; OMB Number Pending.

Needs and Uses

The EAC issues the EAVS to meet its obligations under the Help America Vote Act of 2002 (HAVA) to serve as national clearinghouse and resource for the compilation of information with respect to the administration of Federal elections; to fulfill both the EAC and the Department of Defense Federal Voting Assistance Program's (FVAP) data collection requirements under the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA); and meet its National Voter Registration Act (NVRA) mandate to collect information from states concerning the impact of that statute on the administration of Federal elections. In addition, under the NVRA, the EAC is responsible for collecting information and reporting, biennially, to Congress on the impact of that statute. The information the states are required to submit to the EAC for purposes of the NVRA report are found under Title 11 of the Code of Federal Regulations. States that respond to questions in this survey concerning voter registration-related matters will meet their NVRA reporting requirements under 52 U.S.C. 20508 and EAC regulations. Finally, UOCAVA

mandates that FVAP work with the EAC and chief state election officials to develop standards for reporting UOCAVA voting information (52 U.S.C. 20302) and that FVAP will store the reported data and present the findings within the congressionally-mandated report to the President and Congress. Additionally, UOCAVA requires that “not later than 90 days after the date of each regularly scheduled general election for Federal office, each state and unit of local government which administered the election shall (through the state, in the case of a unit of local government) submit a report to the EAC on the combined number of absentee ballots transmitted to absent uniformed services voters and overseas voters for the election and the combined number of such ballots which were returned by such voters and cast in the election, and shall make such a report available to the general public.” States that complete and timely submit the UOCAVA section of the survey to the EAC will fulfill their UOCAVA reporting requirement under 52 U.S.C. 20302. In order to fulfill the above requirements, the EAC is seeking information relating to the period from the Federal general election day 2018 +1 through the November 2020 Federal general election. The EAC will provide the data regarding UOCAVA voting to FVAP after data collection is completed. This data sharing reduces burden on local election offices because FVAP does not have to conduct its own data collection to meet its reporting requirements.

Affected Public (Respondents): State or local governments, the District of Columbia, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands.

Affected Public: State or local government.

Number of Respondents: 56.

Responses per Respondent: 1.

Estimated Burden per Response: 235 hours per collection, 117.5 hours annualized.

Estimated Total Annual Burden Hours: 13,160 hours per collection, 6,580 hours annualized.

Frequency: Biennially.

DEPARTMENT OF ENERGY

[Case Number 2019-006; EERE-2019-BT-WAV-0020]

Energy Conservation Program: Petition for Waiver of Bradford White Corporation From the Department of Energy Consumer Water Heaters Test Procedure and Grant of Interim Waiver

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of petition for waiver and grant of an interim waiver, and request for comments.

SUMMARY: This document announces receipt of and publishes a petition for waiver from Bradford White Corporation (“BWC”), which seeks a waiver for a specified consumer water heater basic model from the U.S. Department of Energy (“DOE”) test procedure used for determining the efficiency of consumer water heaters. BWC asserts that for that identified basic model, application of the calculation specified in the DOE test procedure to determine recovery efficiency yields an “artificially high” value that in turn results in a lower overall uniform energy factor value. Consequently, BWC seeks to use an alternate test procedure to address issues involved in testing the basic model identified in its petition. More specifically, BWC has requested that DOE waive the equation for calculating recovery efficiency of the consumer gas-fired storage water heater basic model for which the first occurrence of the main burner cutting out (“cut-out”) occurs during a draw. Instead, BWC requests that the recovery efficiency for this water heater be calculated using a revised recovery efficiency equation that accounts for the first cut-out occurring during a draw. For the reasons discussed in this document, DOE grants BWC an interim waiver from the DOE’s consumer water heater test procedure for the basic model listed in the interim waiver, subject to use of the alternate test procedure as set forth in the Interim Waiver Order. DOE solicits comments, data, and information concerning BWC’s petition, its suggested alternate test procedure, and the alternate test procedure in the Interim Waiver Order so as to inform its final decision on BWC’s waiver request.

DATES: Written comments and information will be accepted on or before November 7, 2019.
