Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the

comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Discharge Monitoring Report-Quality Assurance (DMR-QA) study program participation is mandatory for major and selected minor National Pollutant Discharge Elimination System (NPDES) permit holders in accordance with Clean Water Act Section 308. The DMR-QA study program is designed to evaluate the analytic ability of laboratories that perform chemical, microbiological and whole effluent toxicity (WET) analyses required in NPDES permits for reporting results in the Discharge Monitoring Reports (DMR). Under DMR-QA, the permit holder is responsible for having their in-house and/or contract laboratories analyze proficiency test samples and submit results to proficiency testing (PT) providers for grading. Graded results are transmitted by either the permit holder or PT provider to the appropriate federal or state NPDES permitting authority. Permit holders are responsible for submitting corrective action reports to the appropriate permitting authority.

Form numbers: 6400-01.

Respondents/affected entities: Major and selected minor permit holders under the Clean Water Act's National Pollutant Discharge Elimination System (NPDES).

Respondent's obligation to respond: Major permit holders must participate annually. Minor permit holders must participate if selected by the state or EPA DMR-QA coordinator.

Estimated number of respondents: 5,500 (total).

Frequency of response: Major permit holders must participate annually. Minor permit holders must participate if selected by the state or EPA DMR-QA coordinator.

Total estimated burden: 36,300 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$5,240,070 (per year), includes \$3,243,350 annualized capital or operation & maintenance costs.

Changes in estimates: There is a decrease of 1,320 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a slight decrease of NPDES major permit holders over the last three years. Labor costs will be revised upward to account for changes in employee benefit

compensation costs and inflation. Non-labor costs for obtaining proficiency test samples will also likely increase.

Dated: October 3, 2019.

Martha Segall,

Acting Director, Monitoring, Assistance, and Media Programs Division, Office of Compliance.
