

of existing roads: 505 miles in Idaho and 558 miles in Oregon. No fuel breaks would be constructed in designated wilderness. Fuel breaks may be established along the non-wilderness side of boundary roads adjacent to designated wilderness. Fuel breaks may only be established along boundary roads of lands with wilderness characteristics and WSAs.

Alternative 4 emphasizes protection to wildlife and their habitat while providing a network of fuel breaks that meets the purpose and need. The fuel-break network for this alternative would span 910 miles of existing roads: 450 miles in Idaho and 460 miles in Oregon. Fuel-break construction in relation to wilderness, lands with wilderness characteristics, and WSAs would be identical to Alternative 2.

A preferred alternative has not been identified for the Draft EIS, but will be identified for the Final EIS, as per 40 CFR 1502.14(e). The Final EIS will reflect changes or adjustments based on public comments received on the Draft EIS, and any new information that is identified. The preferred alternative in the Final EIS may include portions of any analyzed alternatives. For this reason, the BLM encourages comments on all alternatives and management actions described in the Draft EIS.

You may submit written comments on the Draft EIS to the BLM at any public meeting or through any of the methods identified in the **ADDRESSES** section. All comments must be received by the end of the comment period. Comments submitted must include the commenter's name and street address. Whenever possible, please include reference to either the page or section in the document to which the comment applies.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, are available for public inspection in their entirety.

Abstract: The purpose of this information collection is to assist the NPS in submitting suitable trails or trail systems to the Secretary of the Interior for designation as National Recreation Trails (NRT). This collection is also used to recommend exemplary water trails to the Secretary of the Interior for designation as National Water Trails (NWT) to be included in the National Water Trails System (NWTS). The NPS is authorized to administer the NRT program in section 4 of the National Trails System Act, 16 U.S.C. 1243. Secretarial Order No. 3319 established National Water Trails as a class of National Recreation Trails and directed that such trails collectively be considered in a National Water Trails System.

National Recreation Trail designation provides national recognition to local and regional trails or trail systems, acknowledging local and state efforts to

build and maintain viable trails and trail systems. This recognition function is shared by the Secretary of Agriculture for trails on National Forest lands and waters as well as the Secretary of the Interior for all other trails.

The National Water Trails System is focused on building a national network of exceptional water trails that can be sustained by an ever growing and vibrant water trail community. The NWTS connects Americans to the nation's waterways and strengthens the conservation and restoration of those waterways.

The NPS uses two web-based forms, "Application for Designation as National Water Trail" (Form 10-1002), and "Application for Designation as National Recreation Trail" (Form 10-1003), to evaluate for the adherence to requirements and criteria to be designated as National Recreation Trails or National Water Trails. The forms collect the following information: (1) Justification, (2) Contact information, (3) Owner consent and State support (4) Photographs and maps (5) Best management practices, and (6) Additional supporting materials.

OMB Control Number: 1024-0283.

Form Number: 10-1002, "Application for Designation as National Water Trail" and 10-1003, "Application for Designation as National Recreation Trail".
