

like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may grant or not grant this application based on your comments.

## II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

## III. Request for Exemption

Drivers qualifying for the hours-of-service (HOS) short-haul exception in 49 CFR 395.1(e)(1) do not have to maintain a record of duty status (RODS) on board the vehicle. However, such drivers must return to their normal work reporting location and be released from work within 12 hours after coming on duty. A driver who exceeds the 12-hour limit loses the short-haul exception and must immediately prepare RODS for the entire day, often by means of an electronic logging device (ELD)(49 CFR 395.8(a)(1)(i)). KED is requesting that its short-haul CMV drivers be permitted to return within 14 hours instead of 12 without losing their short-haul status.

Kentucky Equipment Distributors (KED) is comprised of several large machinery distributors operating in several states whose fleet focuses on agriculture, construction, mining, as well as road paving. KED includes seven companies and approximately 3,500 employees. The requested exemption

would apply to short-haul drivers engaged in the transportation and repair of equipment and machinery. KED drivers generally meet the requirements of the short-haul operations exception, though they may occasionally take more than 12 hours to return and be released from their work reporting location. The requested increase to 14 hours will ensure KED drivers meet the requirements of the short-haul operations exception.

KED companies currently own and operate 431 vehicles that fall under the HOS regulations in 49 CFR part 395. Most of the vehicles are field service and parts delivery trucks. Duties associated with these vehicles enable the company to bring their shop/tools to the piece of equipment needing servicing versus having to transport the equipment back to the shop. KED's drivers perform duties such as but not limited to: onsite repairs, hauling parts and components, as well as routine maintenance. The vehicles are primarily utilized for haulage of equipment and tooling as relates to their primary use versus utilization for long-haul trucking.

Operators and owners within KED operate a series of large delivery vehicles and are not classified as long-haul drivers. All KED drivers perform a great deal of work outside of the vehicle, unlike drivers whose extended time behind the wheel makes them susceptible to fatigue. KED requests that these vehicles, which are like ready-mixed concrete and oilfield operational trucks, be designated for the exemption. KED drivers, like that of the ready-mixed concrete industry, spend most their shift hours performing non-driving job duties, which lessens driver fatigue. KED estimates that only 20% of its drivers' daily duties involves driving, typically to and from the worksite.

According to KED, the application is consistent with the current 14-hour limit for drivers of ready-mixed concrete vehicles. KED also pointed out that FMCSA had granted similar short-haul exemptions to Waste Management (WM) and the National Asphalt Pavement Association (NAPA). According to KED, WM drivers spend 30–50% of their time in “collection mode” and NAPA drivers drive 20% of the time. KED estimates that its drivers travel between 50–80 miles during each shift; driving time is therefore less than 20% of the individual's total duties.

KED's application for exemption is available for review in the docket for this notice.

## IV. Method To Ensure an Equivalent or Greater Level of Safety

To ensure an equivalent level of safety, KED offers supplementary driver management training which includes identifying and managing sleep deprivation, reducing eye strain, as well as driver fatigue prevention. According to KED, this training helps drivers to understand as well as identify triggers associated with fatigue, and provides help to minimize fatigue. KED notes that Waste Management and asphalt paving workers have similar daily schedules, where driving is only a small part of their workload.

A copy of KED's application for exemption is available for review in the docket for this notice.

### Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2019–0180]

#### Hours of Service of Drivers: Application for Exemption From the 14-Hour Rule During Independence Day Celebrations for Illumination Fireworks Partners, LP and ACE Pyro, LLC

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice of application for exemption; request for comments.

**SUMMARY:** FMCSA announces that it has received an application from Illumination Fireworks Partners, LP and ACE Pyro, LLC (Applicants) for an exemption from the requirements that drivers of commercial motor vehicles (CMVs) must not drive following the 14th hour after coming on duty. The exemption would apply solely to the drivers of 60 CMVs employed by the applicant in conjunction with staging fireworks shows in celebration of Independence Day during the period of June 26–July 8, for the next five years (2019–2024) inclusive. During this period, the CMV drivers employed by the applicant would be allowed to exclude off-duty and sleeper-berth time of any length from the calculation of the 14 hours. These drivers would not be allowed to drive after accumulating a total of 14 hours of on-duty time, following 10 consecutive hours off duty, and would continue to be subject to the

11-hour driving time limit, and the 60 and 70-hour on-duty limits. The applicant maintains that the terms and conditions of the limited exemption would ensure a level of safety equivalent to or greater than the level of safety achieved without the exemption.

##### II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reason for the grant or denial, and, if granted, the specific person or class of persons receiving the exemption, and the regulatory provision or provisions from which exemption is granted. The notice must also specify the effective period of the exemption (up to 5 years), and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

##### III. Request for Exemption

The hours-of-service (HOS) rule in 49 CFR 395.3(a)(2) prohibits a property-carrying CMV driver from driving a CMV after the 14th hour after coming on duty following 10 consecutive hours off duty. Illumination Fireworks Partners, LP (USDOT 3247742) and ACE Pyro, LLC (USDOT 1352892) (Applicants) are fireworks display companies that employ CMV drivers who hold commercial driver’s licenses (CDLs) with hazardous materials endorsements. The drivers transport Division 1.3G and 1.4G fireworks and setup of firework shows for Independence Day celebrations. The applicants seek an exemption from the 14-hour rule in 49 CFR 395.3(a)(2) so that drivers would be allowed to exclude off-duty and sleeper-berth time of any length from the calculation of the 14 hours. Illumination Fireworks Partners, LP states that the basis for the request is the existing FMCSA exemption granted to Illumination Fireworks, LLC and ACE Pyro, LLC under Docket No. FMCSA–2014–0111. The applicants state that they are seeking the HOS exemption because compliance with the 14-hour rule would impose economic hardship on cities, municipalities, and themselves. Complying with the

existing regulation means that most shows would require two drivers, significantly increasing the cost of the fireworks display.

The applicants assert that without the extra duty period provided by the exemption, safety would decline as firework drivers would be unable to return to their home base following each show should they have fireworks remaining after the display. Drivers would be forced to park the CMVs carrying Division 1.3G and 1.4G products in areas less secure than the motor carrier's home base.

#### IV. Method To Ensure an Equivalent or Greater Level of Safety

To ensure an equivalent level of safety, the applicant offers short distance driving from the distribution point to the site of the fireworks display, no more than 150 miles. Drivers have several hours of off duty in the late afternoon and early evening the day of the event. In addition, drivers drive in the early morning during light traffic. Lastly, the applicant states that they have not been involved in any reportable accidents while operating under terms and conditions of the same exemption granted to the previous owner of the company.

A copy of the application for exemption is available for review in the docket for this notice.
