SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87335; File No. SR–CboeEDGA–2019–016]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend the Pilot Related to the Market-Wide Circuit Breaker in Rule 11.16

October 17, 2019.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on October 15, 2019, Cboe EDGA Exchange, Inc.

(the “Exchange” or “EDGA”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II, which Items have been prepared by the Exchange. The Exchange filed the proposal as a “non-controversial” proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act³ and Rule 19b–4(f)(6) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (“EDGA” or the “Exchange”) is filing with the Securities and Exchange Commission (the “Commission”) a proposal to extend the pilot related to the market-wide circuit breaker in Rule 11.16. The text of the proposed rule change is enclosed as Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

EDGA Rules 11.16(a) through (d), (f) and (g) describe the methodology for determining when to halt trading in all stocks due to extraordinary market volatility, *i.e.*, market-wide circuit breakers. The market-wide circuit breaker (“MWCBC”) mechanism was approved by the Commission to operate on a pilot basis, the term of which was to coincide with the pilot period for the

Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS (the “LULD Plan”),⁵ including any extensions to the pilot period for the LULD Plan. The Commission recently approved an amendment to the LULD Plan for it to operate on a permanent, rather than pilot, basis.⁶ In light of the proposal to make the LULD Plan permanent, the Exchange amended Rule 11.16 to untie the pilot's effectiveness from that of the LULD Plan and to extend the pilot's effectiveness to the close of business on October 18, 2019.⁷

The Exchange now proposes to amend Rule 11.16 to extend the pilot to the close of business on October 18, 2020. This filing does not propose any substantive or additional changes to Rule 11.16. The Exchange will use the extension period to develop with the other SROs rules and procedures that would allow for the periodic testing of the performance of the MWCBC mechanism, with industry member participation in such testing. The extension will also permit the exchanges to consider enhancements to the MWCBC processes such as modifications to the Level 3 process.

The market-wide circuit breaker under Rule 11.16 provides an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when securities markets experience extreme broad-based declines. All U.S. equity exchanges and FINRA adopted uniform rules on a pilot basis relating to market-wide circuit breakers in 2012 (“MWCBC Rules”), which are designed to slow the effects of extreme price movement through coordinated trading halts across securities markets when severe price declines reach levels that may exhaust market liquidity. Market-wide circuit breakers provide for trading halts in all equities and options markets during a severe market decline as measured by a single-day decline in the S&P 500 Index.

Pursuant to Rule 11.16, a market-wide trading halt will be triggered if the S&P 500 Index declines in price by specified percentages from the prior day's closing price of that index. Currently, the triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2),

⁵ See Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012). The LULD Plan provides a mechanism to address extraordinary market volatility in individual securities.
