#### Prevention of Significant Deterioration, Nonattainment New Source Review, and Title V: Treatment of Corn Milling Facilities Under the “Major Emitting Facility” Definition; Reconsideration

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Partial grant and partial denial of a petition for reconsideration.

**SUMMARY:** On March 2, 2009, the Natural Resource Defense Council (NRDC) submitted a petition for reconsideration (the NRDC Petition) of the rule “Prevention of Significant Deterioration, Nonattainment New Source Review and Title V: Treatment of Certain Ethanol Production Facilities Under the ‘Major Emitting Facility’ Definition” (the Ethanol Rule), published in the **Federal Register** on May 1, 2007. The Ethanol Rule reinterpreted the component term “chemical process plants” within the statutory definition of “major emitting facility” and regulatory definitions of “major stationary source” under the Prevention of Significant Deterioration and Nonattainment New Source Review programs and “major source” under title V, to exclude all facilities that produce ethanol through a natural fermentation

process. In response to the NRDC Petition, the Environmental Protection Agency (EPA) grants the request for reconsideration with regard to NRDC's claim that the Ethanol Rule did not appropriately address the Clean Air Act (CAA) anti-backsliding requirements for nonattainment areas in the Ethanol Rule. Therefore, the EPA is convening a proceeding for reconsideration as provided for under the CAA. In the near future, the EPA will publish a document in the **Federal Register** establishing a comment period and opportunity for a hearing for this proceeding. With regards to the other three claims raised in the NRDC Petition, the EPA denies the request for reconsideration. For these claims, NRDC has failed to establish that they meet the criteria for reconsideration under the CAA.

#### I. Where can I get copies of this document and other related information?

EPA-HQ-OAR-2006-0089. All documents in the docket are listed in the index at <http://www.regulations.gov>. **II. Judicial Review**

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit: (i) When the agency action consists of “nationally applicable regulations promulgated, or final actions taken, by the Administrator,” or (ii) when such action is locally or regionally applicable, if “such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination.” In the Ethanol Rule, the EPA determined that the action was of nationwide scope and effect for the purposes of CAA section 307(b)(1). See 72 FR 24060, 24077 (May 1, 2007).

The EPA has determined that its actions denying the petitions for reconsideration also are of nationwide scope and effect because these actions directly relate to the Ethanol Rule that the EPA previously determined are of nationwide scope and effect. Thus, any petitions for review of the final letters denying the petitions for reconsideration must be filed in the Court of Appeals for the District of Columbia Circuit on or before January 6, 2020.
