Title; Associated Form; and OMB Number: Graphicacy in Interactive Dashboards; OMB Control Number 0703–XXXX.

Needs and Uses: Many modern jobs, including military duties, rely heavily on reading and interpreting simple data displays such as bar graphs, line graphs, and pie charts. However, there is no method for determining the “reading level” of a graph, as may be done for prose through multiple methods. We adapted a methodology for generating queries for a reading comprehension test to generate queries for graph comprehension. We seek to determine how well this methodology works by asking example queries of participants, and simultaneously measuring the difficulty associated with certain graph styles (e.g. multiple axes).

Affected Public: Individuals and households.

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) regulates exports of electric energy from the United States to a foreign country, pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On January 27, 2015, DOE issued Order No. EA-284-D, which renewed the authorization of Noble Americas Solutions LLC (Noble Americas) to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. On January 11, 2017, DOE issued Order No. EA-284-E, recognizing that Noble Americas changed its name to Calpine Energy Solutions, LLC (Calpine Solutions). The authorization issued to Calpine Solutions f/k/a Noble Americas expires on January 29, 2020. On October 16, 2019, Calpine Solutions filed an application with DOE (Application or App.) for renewal of the export authorization contained in Order No. EA-284-D (as amended in Order No. EA-284-E) for an additional five-year term.

The Application states that “Calpine Solutions does not have a franchised utility service area” and that “Calpine Solutions proposes to continue to export electric power through the existing facilities of [San Diego Gas & Electric Company] and [Comisión Federal de Electricidad].” App. at 3. The electric energy that the Applicant proposes to export to Mexico would be purchased from “electric utilities, merchant generators, energy brokers, and federal power marketing agencies.” *Id.* The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission’s (FERC) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding

A final decision will be made on the Application after the environmental impacts have been evaluated pursuant to DOE’s National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE determines that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of the Application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.
