

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on August 16, 2019. The collection involves requesting that small on-demand operators voluntarily provide the number of revenue passengers that boarded their aircraft at each airport annually. This information is used in determining an airport's category and eligibility for federal funding on an annual basis. It is not available through any other federal data source.

DATES: Written comments should be submitted by December 27, 2019.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to oir_submission@omb.eop.gov, or faxed to (202) 395-6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Luis Loarte by email at: Luis.Loarte@faa.gov; phone: 202-267-9622.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120-0067.

Title: Air Taxi and Commercial Operator Airport Activity Survey.

Form Numbers: FAA Form 1800-31.

Type of Review: Clearance of a renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following

collection of information was published on August 16, 2019 under FRN document citation number 2019-0640. The data collected through this survey is the only source of data for charter and nonscheduled passenger data by Part 135 operator (air taxis). The data received on the form (either paper or signed electronic copy) is then incorporated into the Air Carrier Activity Information System which is used to determine whether an airport is eligible for Airport Improvement Program funds and for calculating primary airport sponsor apportionment as specified by title 49 United States Code (U.S.C.) 47114. The data collected on the form includes passenger enplanements by carrier and by airport. Passengers traveling on air taxis would be overlooked entirely if this passenger survey were not conducted. As a result, many airports would not receive their fair share of funds since there is currently no other source for this type of charter activity. On average, approximately 100 operators respond each year, reporting a total 1.1 million passengers. This data is important to those airports that struggle to meet the 2,500 and 10,000 passenger levels and could not do so without the reporting of the charter passengers.

Respondents: The voluntary survey is sent through the U.S. Postal Service to approximately 190 small on-demand operators (certificated under Federal Aviation Regulation Part 135) that have reported activity in the last three years. The form is also available on the FAA website. Beginning with the calendar year 2019 data, operators will be able to access the form, electronically sign and submit it to the FAA.

Frequency: Annually.

Estimated Average Burden per Response: 1.5 hours per respondent.

Estimated Total Annual Burden: On average, approximately 100 respondents submit an annual response. The cumulative total annual burden is estimated to be 150 hours.

Issued in Washington, DC, on November 20, 2019.

Luis Loarte,

Senior Airport Planner, Office of Airports/ Airport Planning and Environmental Division.

Federal Aviation Administration

[Docket No. FAA-2019-0819]

Agency Information Collection

Activities: Requests for Comments; Clearance of a New Approval of Information Collection: National Sleep Study

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The collection involves study on relationships between aircraft noise events and the probability of waking up.

DATES: Written comments should be submitted by January 27, 2020.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Dr. Natalia Sizov, The FAA Policy, International Affairs and Environment, 800 Independence Ave. SW, Washington, DC 20591.

By fax: 202-267-5594.

FOR FURTHER INFORMATION CONTACT: Dr. Natalia Sizov by email at: natalia.sizov@faa.gov; phone: 202-267-3553.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120-XXXX.

Title: National Sleep Study.

Form Numbers: None.

Type of Review: Clearance of a new information collection.

Background: The main purpose of the National Sleep Study is to collect nationally representative information on the effects of aircraft noise on sleep and to derive exposure-response relationships between aircraft noise and

its effect on communities around United States civilian airports. This Study will collect information about single aircraft noise events levels and the probability of resident's waking up. The FAA will use the information from this collection to derive the empirical data to inform any potential updates to or validation of the national aviation noise policy.

Respondents: Approximately 4,400 respondents to 25,000 postal surveys (18% response rate). From among these survey respondents, approximately 400 respondents (9.1%) will be recruited into the field study.

Frequency: Response to the postal survey, and participation in the field study, will be a one-time event.

Estimated Average Burden per Response: The postal survey will take an estimated 8.25 minutes to complete. The field study will take an estimated 2 hours and 33 minutes of active participation across 5 study days to complete.

Estimated Total Annual Burden: The estimated total annual burden for the postal survey is 302 hours and 30 minutes in each of the two years of the study, and 510 hours for field study.

Issued in Washington, DC, on November 21, 2019.

Rebecca Cointin,

Executive Director (Acting), FAA Office of Environment & Energy.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions of Proposed Highway/Interchange Improvement in Ohio; Statute of Limitations on Claims

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review of actions by the Ohio Department of Transportation (ODOT), pursuant to 23 U.S.C. 327.

SUMMARY: The FHWA, on behalf of ODOT, is issuing this notice to announce actions taken by ODOT that are final. The actions relate to the proposed modification of United States Route 62 (US-62) in the County of Stark, State of Ohio. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA, of behalf of ODOT, is advising the public of final agency actions subject to 23 U.S.C. 139(I)(1). A claim seeking judicial review of the Federal Agency

Actions on the highway project will be barred unless the claim is filed on or before April 27, 2020. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter period of time still applies.

FOR FURTHER INFORMATION CONTACT: For FHWA: Noel F. Mehlo, Jr., Planning and Environmental Specialist, FHWA Ohio Division Office; HPD-OH, 200 North High Street, Room 328, Columbus, Ohio 43215-2408, 614-280-6841, Noel.Mehlo@dot.gov.

SUPPLEMENTARY INFORMATION: Effective December 11, 2015 and as amended June 6, 2018, the Federal Highway Administration (FHWA) assigned, and the Ohio Department of Transportation (ODOT) assumed, environmental responsibilities for this project pursuant to 23 U.S.C. 327. Notice is hereby given that ODOT, has taken final agency actions subject to 23 U.S.C. 139(I)(1) by issuing licenses, permits, and approvals for the following highway project in the State of Ohio. The project will improve the existing 0.9-mile section of US 62 between State Route (SR) 43 (Market Avenue) and the bridge over the Middle Branch of Nimishillen Creek. The project will reconstruct and relocate US 62 to the north of the existing alignment to improve sight distance on the eastbound curve and eliminate many driveways directly accessing US 62. The project will create cul-de-sacs at Gibbs Avenue, Rowland Avenue, and Gross Avenue (north side) and convert Maple Avenue to a right-in/right-out access. Most of the properties along the north side of the existing US 62 alignment and several properties along the south side of US 62 around the Gibbs Avenue and St. Elmo Avenue intersections will be removed by the project. The existing signalized intersections at Rowland Avenue and Maple Avenue will be removed. Direct access to (and across) US 62 for the northern and southern neighborhoods will be provided via a new signalized intersection at St. Elmo Avenue that will include street lighting, Americans with Disabilities Act (ADA) compliant pedestrian cross walks, a median refuge, and pedestrian signal features. The St. Elmo signal will provide access to a two-lane frontage road that will be constructed south of the new US 62 alignment to provide access to the businesses and residences on the south side of US 62 between Gibbs Avenue and St. Elmo Avenue.

US 62 will be reconstructed as a four-lane roadway (two lanes in each direction) with additional auxiliary lanes and turn lanes added to provide an acceptable level of service at the new

St. Elmo Avenue signalized intersection. In the eastbound direction, an auxiliary lane will begin at the SR 43 entrance ramp and continue east to tie into the existing Harrisburg intersection right turn lane. Heading westbound, an auxiliary lane will travel from just east of the St. Elmo intersection to 30th Street NE, providing direct access from US 62 to 30th Street NE. With the addition of the auxiliary lanes described above, the majority of proposed US 62 within the project limits will resemble a six-lane roadway with three eastbound lanes and three west bound lanes. Center-left turn lanes will also be provided on both eastbound and westbound US 62 at the signalized intersection with St. Elmo Avenue.

The west and east ends of the project are designed at a 50 mile per hour (mph) design speed transitioning to a 45 mph design speed between Rowland Avenue and Maple Avenue to accommodate the signalized intersection and pedestrian crossing at St. Elmo Avenue. Various design elements will be incorporated into the project between Rowland Avenue and Maple Avenue including reduced shoulder width, landscaping, and signing to comply with the reduced design speed.

A new storm sewer system will be provided to collect the drainage along US 62 and the frontage road to be constructed south of the new US 62 alignment. The project will reconstruct the existing storm water conduit and an outfall to the Middle Branch of Nimishillen Creek south of the existing US 62 roadway embankment and construct a new storm sewer north of US 62 which will also discharge into the Middle Branch of Nimishillen Creek.

Based upon the ability to meet the purpose and need of the project, public comments, and impacts to the natural and human environment, ODOT selected Alternative G1-d3a, presented in the March 2017 Feasibility Study, as the Preferred Alternative selected for the July 2018 Environmental Assessment for the project. The Preferred Alternative meets the safety needs of the project and maintains access to US 62 for the nearby neighborhoods and commercial properties.

Following the Public Hearing and 30-day comment period for the July 2018 Environmental Assessment, the project team conducted further investigation and analyses on the Preferred Alternative (G1-d3a) as part of the public involvement process and consideration of Performance Based Practical Design (PBPDP) initiative. Through this exercise, the project team identified design changes that minimize access and right-of-way impacts and
