SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) is proposing guidance to Federal agencies on the publication and implementation of Vulnerability Disclosure Policies (VDPs). VDPs, which are processes for the intake and addressing of security vulnerabilities uncovered by security researchers and the public, are among the most effective methods for obtaining new insights regarding security vulnerability information. They also provide protection for those who uncover these vulnerabilities by differentiating between acceptable and unacceptable means of gathering security information (also known as “authorizing good faith security research”). VDPs make it easier for the

security research community to report vulnerabilities to appropriate agency contacts, who can then use the reports to address vulnerabilities of which they may not have been aware.

Authority for this notice is granted under the Federal Information Security Modernization Act of 2014 (44 U.S.C. 3553–3554).

Suzette Kent,

Federal Chief Information Officer, Office of the Federal Chief Information Officer.
