

Act and 19 CFR 351.224(f), that we made a ministerial error in the *CCR Final Results* by stating that we would instruct CBP to suspend entries of subject merchandise produced or exported by TAK at a 0.00 percent cash deposit rate. In fact, for merchandise both produced and exported by TAK, we will instruct CBP not to suspend liquidation of entries of subject merchandise because that merchandise is excluded from the AD order on PSF from Korea. For those entries, we will also instruct CBP to liquidate such entries without regard to antidumping duties. For entries of merchandise produced, but not exported, or exported, but not produced, by TAK, the all-others rate determined in the underlying investigation¹¹ will continue to be applicable.

With respect to the effective date of these results of a CCR, also in accordance with section 751(h) of the Act and 19 CFR 351.224(f), we determine further that we made a ministerial error in the *CCR Final Results* when we indicated that the results would be effective upon publication of the final results notice, rather than the date of the merger. Because some of the merchandise exported by TAK will be excluded from the AD order on PSF from Korea, the effective date should be the date of the merger. Accordingly, pursuant to 19 CFR 351.224(e), we are amending the *Final Results* to correct these errors.

Commerce intends to issue liquidation instructions to CBP 15 days after publication of these amended final results of this CCR instructing CBP to not suspend liquidation of, and to liquidate without regarding to antidumping duties, subject merchandise produced and exported by TCK's successor-in-interest, TAK, entered, or withdrawn from warehouse, for consumption on or after April 1, 2019.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification to Interested Parties

We are issuing this determination and publishing these final results and notice in accordance with sections 751(h) and 777(i) of the Act and 19 CFR 351.224(e).

Dated: November 20, 2019.

Christian Marsh,

Deputy Assistant Secretary for Enforcement and Compliance.

SUPPLEMENTARY INFORMATION:

Background

Section 117 of the MMPA (16 U.S.C. 1361 *et seq.*) requires NMFS and the U.S. Fish and Wildlife Service (FWS) to prepare stock assessments for each stock of marine mammals occurring in waters under the jurisdiction of the United States, including the U.S. Exclusive Economic Zone. These reports must contain information regarding the distribution and abundance of the stock, population growth rates and trends, estimates of annual human-caused mortality and serious injury (M/SI) from all sources, descriptions of the fisheries with which the stock interacts, and the status of the stock. Initial reports were completed in 1995.

The MMPA requires NMFS and FWS to review the SARs at least annually for strategic stocks and stocks for which significant new information is available, and at least once every three years for non-strategic stocks. The term "strategic stock" means a marine mammal stock: (A) For which the level of direct human-caused mortality exceeds the potential biological removal level or PBR (defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population); (B) which, based on the best available scientific information, is declining and is likely to be listed as a threatened species under the Endangered Species Act (ESA) within the foreseeable future; or (C) which is listed as a threatened species or endangered species under the ESA. NMFS and the FWS are required to revise a SAR if the status of the stock has changed or can be more accurately determined.

Prior to public review, the updated SARs under NMFS' jurisdiction are peer-reviewed within NMFS Fisheries Science Centers and by members of three regional independent Scientific Review Groups, established under the MMPA to independently advise NMFS on information and uncertainties related to the status of marine mammals.

The period covered by the 2019 draft SARs is 2013-2017. NMFS reviewed the status of all marine mammal strategic stocks as required and considered whether significant new information was available for all other stocks under NMFS' jurisdiction. As a result of this review, NMFS revised a total of 65 reports representing 76 stocks in the Alaska, Atlantic, and Pacific regions to incorporate new information. The 2019 revisions consist primarily of updated or revised M/SI estimate, updated abundance estimates, including the
