Title: The Ocean Enterprise: A study of US business activity in ocean measurement, observation, and forecasting.

OMB Control Number: 0648-0712.

Form Number(s): None.

Type of Request: Regular (Reinstatement with change of a previously approved collection).

Number of Respondents: 200.

Average Hours per Response: 0.5 hours.

Needs and Uses: NOAA's National Ocean Service is requesting approval to repeat a web-based survey of employers who provide either services or infrastructure to the Integrated Ocean Observing System (IOOS) or organizations that add value to the IOOS data and other outputs by tailoring them for specific end uses. The purpose of the survey and overall project is to gather data to articulate the collective and derived value of the IOOS enterprise, and to create a profile of businesses and organizations who are involved with providing services or utilizing the data for other specific end uses. This will be the second survey of its kind on a national scale following the first survey conducted in FY2015.

The web survey will be the final data collection piece of this repeat study and is necessary in order to collect demographic, financial, and functional information for each organization with regard to their involvement with IOOS. The final deliverable of this project is an analytic report detailing the findings of the web survey and the analysis of the employer database. The marine technology industry is an important partner and stakeholder within IOOS: This follow up study will build upon the previous baseline study conducted in FY2015 and will identify trends in this important industry cluster. This information can be used to understand the changing value of export sales and the identification of potential growth and/or new international markets which

would further the Department of Commerce (DOC) strategic goal for better environment intelligence (https://www.commerce.gov/sites/commerce.gov/files/us_commerce_plan.pdf) and translate into better programs by the DOC International Trade Administration in ocean observing industries in international trade.
