[Docket No. CP19-512-000]

Texas Eastern Transmission, L.P.; Notice of Schedule for Environmental Review of the Cameron Extension Project

On September 26, 2019, Texas Eastern Transmission, L.P. (Texas Eastern) filed an application in Docket No. CP19-512-000 requesting a Certificate of Public

Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities in Louisiana. The proposed project is known as the Cameron Extension Project (Project), and would provide 750 million cubic feet per day of firm transportation service.

On October 9, 2019, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—March 9, 2020.
90-day Federal Authorization Decision
Deadline—June 7, 2020.

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

Texas Eastern proposes to construct and operate a new compressor station (East Calcasieu Compressor Station) in Calcasieu Parish, Louisiana. The new compressor station is comprised of one 30,000 ISO-rated horsepower, natural gas-driven turbine compressor unit and related appurtenances. The Project would also consist of three new delivery meter and regulatory stations in Cameron, Beauregard, and Jefferson Davis Parishes, Louisiana; installation of 0.2 mile of 30-inch-diameter piping to interconnect with TransCameron Pipeline, LLC's pipeline system in Cameron Parish, Louisiana; installation of miscellaneous equipment at the Gillis Compressor Station in Beauregard Parish, Louisiana; modifications to existing internal pipeline inspection launcher and receiver facilities and two new bypass facilities at existing sites along Texas Eastern's Line 41; and other related auxiliary facilities and appurtenances.

Background

On November 8, 2019, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed Cameron Extension Project and Request for Comments on Environmental Issues* (NOI). The NOI

was sent to affected landowners; federal, state, and local government representatives and agencies; elected officials; Native American tribes; other interested parties; and local libraries and newspapers. All substantive comments in response to the NOI will be addressed in the EA.

Mountain Valley Pipeline, LLC; Notice of Revised Schedule for Environmental Review of the Southgate Project

This notice identifies the Federal Energy Regulatory Commission staff's revised schedule for the completion of the final Environmental Impact Statement (EIS) for Mountain Valley Pipeline, LLC's Southgate Project. The first notice of schedule, issued on March 15, 2019, identified December 19, 2019 as the final EIS issuance date. However, Mountain Valley filed additional

information on October 23, 2019 that included changes to the route and revised data for resource impacts. Because the supplemental information needs further review and required an additional notice to the landowners affected by the route changes, issued on November 15, 2019, Commission staff has revised the schedule for issuance of the final EIS.

Schedule for Environmental Review

Issuance of Notice of Availability of the final EIS February 14, 2020

90-day Federal Authorization Decision Deadline May 14, 2020

If a schedule change becomes necessary, an additional notice will be provided so that the relevant agencies are kept informed of the project's progress.
