BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Proposed Information Collection; Comment Request; Building for Environmental and Economic Sustainability (BEES) Please

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before February 7, 2020.

ADDRESSES: Direct all written comments to Maureen O'Reilly, Management Analyst, National Institute of Standards and Technology, 100 Bureau Drive, Gaithersburg, MD 20889-1710, (or via the internet at PRAComments@doc.gov). All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Joshua D. Kneifel, (301) 975-6857 or joshua.kneifel@nist.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

For more than 25 years, the Engineering Laboratory of the National Institute of Standards and Technology (NIST) has developed and automated an approach for measuring the life-cycle environmental and economic performance of building products. Known as BEES (Building for Environmental and Economic Sustainability), the tool reduces complex, science-based technical content (e.g., over 1000 material and

energy flows from raw material extraction through product disposal) to decision-enabling results and delivers them in a visually intuitive graphical format. BEES Please is a voluntary program to collect data from product manufacturers so that the environmental performance of their products may be evaluated scientifically using BEES. NIST will publish in BEES Online (<http://ws680.nist.gov/bees>) an aggregated version of the data collected from manufacturers that protects data confidentiality, subject to manufacturer's review and approval. BEES measures environmental performance using the environmental life-cycle assessment approach specified in the International Organization for Standardization (ISO) 14040 series of standards. All stages in the life of a product are analyzed: Raw material acquisition, manufacture, transportation, installation, use, and recycling and waste management. Economic performance is measured using the ASTM International standard life-cycle cost method (E 917), which covers the costs of initial investment, replacement, operation, maintenance and repair, and disposal.

II. Method of Collection

Data on materials use, energy consumption, waste, and environmental releases will be collected using an electronic, MS Excel-based questionnaire. An electronic, MS Word-based User Manual accompanies the questionnaire to help in its completion.

III. Data

OMB Control Number: 0693-0036.

Form Number(s): None.

Type of Review: Renewal (of a current information collection) with changes.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 30.

Estimated Time per Response: 62 hours and 30 minutes.

Estimated Total Annual Burden Hours: 1,875.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

NIST invites comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the

information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Office, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XG881

Marine Mammals; File No. 22686

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that a permit has been issued to the Chicago Zoological Society, Brookfield Zoo (Bill Zeigler, Responsible Party), 3300 Golf Road, Brookfield, IL 60513, to import up to three bottlenose dolphins (*Tursiops truncatus*) for public display.

ADDRESSES: The permit and related documents are available online at <https://www.fisheries.noaa.gov/action/permit-application-import-3-bottlenose-dolphins-file-no-22686-chicago-zoological-society> or upon written request to the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone: (301) 427-8401; fax: (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore and Courtney Smith; phone: (301) 427-8401.

SUPPLEMENTARY INFORMATION: On March 19, 2019, notice was published in the **Federal Register** (84 FR 10044) that a request for a public display permit had been submitted by the above-named applicant. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The permit authorizes the importation of three captive born bottlenose dolphins from Dolphin Quest Bermuda to either the Brookfield Zoo in Brookfield, Illinois or Coral World Ocean Park in St. Thomas, U.S. Virgin Islands for the purpose of public display. The permit expires on December 1, 2024, or upon the importation of all three dolphins, whichever occurs first.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: December 4, 2019.

Julia Marie Harrison,

*Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.*

[RTID 0648-XR073]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Portsmouth Naval Shipyard Dry Dock 1 Modification and Expansion

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from the United States Navy for the re-issuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates. The initial IHA authorized take of five species of marine mammals, by Level A and Level B harassment, incidental to construction associated with the Portsmouth Naval Shipyard Dry Dock 1 modification and expansion in Kittery, Maine. The project has been delayed and none of the work covered in the initial IHA has been conducted. The initial IHA was effective from October 1, 2019, through September 30, 2020. The Navy has requested re-issuance with new effective dates of March 1, 2020, through February 28, 2021. The scope of the activities and anticipated effects remain the same, authorized take numbers are

not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a second IHA to cover the incidental take analyzed and authorized in the initial IHA.

DATES: This authorization is effective from March 1, 2020, through February 28, 2021.

ADDRESSES: An electronic copy of the final 2019 IHA previously issued to the Navy, the Navy's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting www.fisheries.noaa.gov/action/incidental-take-authorization-us-navy-dry-dock-expansion-project-portsmouth-naval-shipyard. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined "negligible impact" in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term "take" means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA

defines "harassment" as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On May 28, 2019, NMFS published final notice of our issuance of an IHA authorizing take of marine mammals incidental to the Portsmouth Naval Shipyard Dry Dock 1 modification and expansion project (84 FR 24476). The effective dates of that IHA were October 1, 2019, through September 30, 2020. On September 30, 2019, the Navy informed NMFS that the project was delayed. None of the work identified in the initial IHA (*e.g.*, pile driving and removal) has occurred. The Navy submitted a request for a new identical IHA that would be effective from March 1, 2020 through February 28, 2021, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA. Therefore, re-issuance of the IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The purpose of the Navy's construction project is to modernize and maximize dry dock capabilities for performing current and future missions efficiently and with maximum flexibility. The need for the proposed action is to modify and expand Dry Dock 1 at the Portsmouth Naval Shipyard by constructing two new dry docking positions capable of servicing Virginia class submarines within the super flood basin of the dry dock. The location, timing, and nature of the activities, including the types of equipment planned for use, are within scope of those described in the initial IHA. The mitigation and monitoring are also as prescribed in the initial IHA.

Species that are expected to be taken by the planned activity include harbor porpoise (*Phocoena phocoena*), harbor seal (*Phoca vitulina*), gray seal (*Halichoerus grypus*), hooded seal (*Cystophora cristata*), and harp seal
