#### Ute Indian Tribe Notice of Successive Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On August 30, 2019, Ute Indian Tribe filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Ute Pumped Storage Project (Ute Project or project) adjacent to the Bureau of Reclamation's Flaming Gorge Reservoir, in Daggett County, Utah. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) An intake and discharge structure at one of seven locations in Flaming Gorge Reservoir; (2) an underground tailrace between the reservoir intake/outlet structure and the powerhouse; (3) pump-turbine units in an underground powerhouse with generation capacity of between 500 to 1,000 megawatts; (4) a penstock between the powerhouse and the upper reservoir; (5) a dam at one of seven locations forming the upper reservoir; (6) an upper reservoir at one of seven locations with a capacity between 5,000 and 10.000 acre-feet, at an elevation between 6,800 and 7,500 feet above mean sea level; (7) a transmission line from the powerhouse to the nearest major transmission interconnection; and (8) appurtenant facilities. The estimated annual generation of the Ute Project would be between 400 and 850 gigawatt-hours.
