**SUPPLEMENTARY INFORMATION:****Background**

Section 9 of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and its implementing regulations prohibit the “take” of animal species listed as endangered or threatened. Take is defined under the ESA as to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect “listed animal species”, or to attempt to engage in such conduct” (16 U.S.C. 1538). However, under section 10(a) of the ESA, we may issue permits to authorize incidental take of listed species. “Incidental take” is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing incidental take permits for endangered and threatened species, respectively, are found in the Code of Federal Regulations at 50 CFR 17.22 and 50 CFR 17.32.

**Applicant’s Proposed Project**

The applicant requests a 25-year ITP to take the federally endangered Indiana bat (*Myotis sodalis*) and threatened northern long-eared bat (*Myotis septentrionalis*). The applicant determined that unavoidable take is reasonably certain to occur incidental to operation of 40 previously constructed wind turbines. The proposed conservation strategy in the applicant’s proposed HCP is designed to avoid, minimize, and mitigate the impacts of the covered activity on the covered species. The biological goals and objectives are to minimize potential take of Indiana bats and northern long-eared bats through onsite minimization measures and to provide habitat conservation measures for Indiana bats and northern long-eared bats to offset any unavoidable impacts from operations of the project. The HCP provides onsite avoidance and minimization measures, which include turbine operational adjustments. The estimated level of take from the project is 4 Indiana bats and 16 northern long-eared bats over the 25-year project duration. To offset the impacts of the unavoidable taking of Indiana bats and northern long-eared bats, the applicant proposes to protect a high priority winter hibernaculum by installing a gate.

**National Environmental Policy Act**

The issuance of an ITP is a Federal action that triggers the need for compliance with NEPA (42 U.S.C. 4321 *et seq.*). We prepared a draft EA that analyzes the environmental impacts on the human environment resulting from three alternatives: A no-action alternative, the proposed action, and an alternative consisting of feathering below the manufacturer’s cut-in wind speed.

**Next Steps**

The Service will evaluate the application and the comments received to determine whether the permit application meets the requirements of section 10(a) of the ESA (16 U.S.C. 1531 *et seq.*). We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the above findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue the requested ITP to the applicant.

**Public Comments**

The Service invites the public to comment on the proposed HCP and draft EA during a 30-day public comment period (see **DATES**). You may submit comments by one of the methods shown under **ADDRESSES**.

**Public Availability of Comments**
