

Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at <https://www.archives.gov/records-mgmt/rcs>, after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

Schedules Pending

1. Department of Homeland Security, Agency-wide, Administrative and Operational Records Common to All Offices (DAA-0563-2019-0008).

2. Department of Transportation, Pipeline and Hazardous Materials Safety Administration, Engineering and Research Records (DAA-0571-2015-0015).

3. Commodity Futures Trading Commission, Agency-wide, External Outreach Records (DAA-0180-2018-0007).

4. Office of Personnel Management, Agency-wide, Records of the Agency Compliance and Evaluation Program (DAA-0478-2019-0001).

5. Securities and Exchange Commission, Division of Corporation Finance, Confidential Treatment Materials (DAA-0266-2019-0002).

Laurence Brewer,

Chief Records Officer for the U.S. Government.

BILLING CODE 7515-01-P

NATIONAL SCIENCE FOUNDATION

Proposal Review Panel for Ocean Sciences

Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Proposal Review Panel for Ocean Sciences OCE (#10752).

Date and Time: February 26-28, 2020; 9:00 a.m. to 5:00 p.m.

Place: JOIDES Resolution Science Operator (JRSO), 1000 Discovery Drive, College Station, TX 77840.

Type of Meeting: Part Open.

Contact Person: James Allan, Program Director, Division of Ocean Science; National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; Telephone: (703) 292-8583.

Purpose of Meeting: To provide advice and recommendations regarding Operations and Management of the Drilling Vessel JOIDES Resolution for the International Ocean Discovery Program (IODP) and JR100 program relating to performance in FY2019 under Cooperative Agreement Award 1326927.

Agenda

Wednesday, February 26, 2020

9:00 a.m.-9:15 a.m. NSF and panel introduction

9:15 a.m.-11:00 a.m. Initial Report of the JOIDES Resolution Science Operator (JRSO)—(Open)

11:00 a.m.-12:00 p.m. Co-Chief Review Report for FY2019—(Open)

12:00 p.m.-1:00 p.m. Lunch

1:00 p.m.-3:00 p.m. JRSO response to Co-Chief Review Report—(Open)

3:00 p.m.-4:00 p.m. Meet with JRSO Staff—(Open)

4:00 p.m.-5:00 p.m. Site Visit Panel discussion of presentations and overnight questions to JRSO—(Closed)

Thursday, February 27, 2020

9:00 a.m.-11:00 a.m. JRSO discussion of major challenges and successes in operational context, and how they are responding—(Open)

11:00 a.m.-12:00 p.m. Effectiveness of IODP Programmatic Planning Structure—(Open)

12:00 p.m.-1:00 p.m. Lunch

1:00 p.m.-2:00 p.m. JRSO discussion of major challenges in providing services and innovation to IODP science community, and how they are responding—(Open)

2:00 p.m.-3:00 p.m. Response of JRSO to any remaining Panel questions—(Open)

3:00 p.m.-3:30 p.m. Break

3:30 p.m.-5:00 p.m. Site Visit Panel Discussion on panel report structure and overnight questions to JRSO—(Closed)

Friday, February 28, 2020

9:00 a.m.-10:00 a.m. Site Visit Panel discussion; work on report—(Closed)

10:00 a.m.-11:00 a.m. Response of JRSO to Panel questions—(Open)

11:00 a.m.-12:00 p.m. Site Visit Panel discussion; work on report—(Closed)

12:00 p.m.-1:00 p.m. Lunch—(Closed)

1:00 p.m.-3:30 p.m. Site Visit Panel discussion; work on report—(Closed)

3:30 p.m.-4:00 p.m. Break

4:00 p.m.-5:00 p.m. Site Visit Panel presents report and recommendations to JRSO—(Closed)

Reason for Closing: The program being reviewed during closed portions of the meeting will include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the program. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: December 12, 2019.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293; NRC-2019-0247]

Holtec Decommissioning International, LLC; Pilgrim Nuclear Power Station

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of exemptions that would permit the licensee to reduce its emergency planning (EP) activities at the Pilgrim Nuclear Power Station (Pilgrim). Specifically, the licensee is seeking exemptions that would eliminate the requirements for the licensee to maintain offsite radiological emergency plans and reduce some of the onsite EP activities based on the reduced risks at Pilgrim, which is permanently shut down and defueled. However, requirements for certain onsite capabilities to communicate and coordinate with offsite response authorities would be retained. In addition, offsite EP provisions would still exist through State and local government use of a comprehensive emergency management plan process, in accordance with the Federal Emergency Management Agency's (FEMA's) Comprehensive Preparedness Guide (CPG) 101, "Developing and Maintaining Emergency Operations Plans." The NRC staff is issuing a final Environmental Assessment (EA) and final Finding of No Significant Impact (FONSI) associated with the proposed exemptions.

DATES: The EA and FONSI referenced in this document are available on December 18, 2019.

ADDRESSES: Please refer to Docket ID NRC-2019-0247 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2019-0247. Address questions about NRC docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301-287-9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov.

nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. In addition, for the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the AVAILABILITY OF DOCUMENTS section of this document.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Scott P. Wall, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2855; email: Scott.Wall@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated November 10, 2015 (ADAMS Accession No. ML15328A053), Entergy Nuclear Operations, Inc. (ENOI) certified to the NRC that it planned to permanently cease power operations at Pilgrim no later than June 1, 2019. By letter dated June 10, 2019 (ADAMS Accession No. ML19161A033), ENOI certified to the NRC that power operations permanently ceased at Pilgrim on May 31, 2019, and that the fuel was permanently removed from the Pilgrim reactor vessel and placed in the spent fuel pool (SFP) on June 9, 2019. Accordingly, pursuant to section 50.82(a)(2) of title 10 of the *Code of Federal Regulations* (10 CFR), the Pilgrim renewed facility operating license no longer authorizes operation of the reactor or emplacement or retention of fuel in the reactor vessel. The facility is still authorized to possess and store irradiated (*i.e.*, spent) nuclear fuel. Spent fuel is currently stored onsite at the Pilgrim facility in the SFP and in a dry cask independent spent fuel storage installation (ISFSI).

By letter dated July 3, 2018 (ADAMS Accession No. ML18186A635), as supplemented by letters dated November 30 and December 4, 2018, and February 14 and February 18, 2019 (ADAMS Accession Nos. ML18338A205, ML18341A219, ML19050A298, and ML19056A260, respectively), ENOI requested exemptions from certain EP requirements in 10 CFR part 50 for Pilgrim.

By letter dated November 16, 2018 (ADAMS Accession No. ML18320A031), ENOI, on behalf of itself and Entergy Nuclear Generation Company (ENGCO) (to be known as Holtec Pilgrim, LLC),

Holtec International (Holtec), and Holtec Decommissioning International, LLC (HDI, the licensee) (together, Applicants), requested that the NRC consent to: (1) The indirect transfer of control of Renewed Facility Operating License No. DPR-35 for Pilgrim, as well as the general license for the Pilgrim ISFSI (together, the Licenses), to Holtec; and (2) the direct transfer of ENOI's operating authority (*i.e.*, its authority to conduct licensed activities at Pilgrim) to HDI. In addition, the Applicants requested that the NRC approve a conforming administrative amendment to the Licenses to reflect the proposed direct transfer of the Licenses from ENOI to HDI; a planned name change for ENGCO from ENGCO to Holtec Pilgrim, LLC; and deletion of certain license conditions to reflect satisfaction and termination of all ENGCO obligations after the license transfer and equity sale.

By Order dated August 22, 2019 (ADAMS Accession No. ML19170A265), the NRC staff approved the direct and indirect transfers requested in the November 16, 2018, application. Additionally, on August 22, 2019, HDI informed the NRC (ADAMS Accession No. ML19234A357) that:

HDI will assume responsibility for all ongoing NRC regulatory actions and reviews currently underway for Pilgrim Nuclear Power Station. HDI respectfully requests NRC continuation of these regulatory actions and reviews.

On August 26, 2019, ENOI informed the NRC that the license transfer transaction closed on August 26, 2019 (ADAMS Accession No. ML19239A037). On August 27, 2019 (ADAMS Accession No. ML19235A050), the NRC staff issued Amendment No. 249 to reflect the license transfer. Accordingly, HDI is now the licensee for decommissioning operations at Pilgrim.

The NRC regulations concerning EP do not recognize the reduced risks after a reactor is permanently shut down and defueled. As such, a permanently shut down and defueled reactor must continue to maintain the same EP requirements as an operating power reactor under the existing regulatory requirements. To establish a level of EP commensurate with the reduced risks of a permanently shut down and defueled reactor, the licensee requires exemptions from certain EP regulatory requirements before it can change its emergency plans.

The NRC is considering issuing to the licensee exemptions from portions of 10 CFR 50.47, "Emergency plans," and appendix E to 10 CFR part 50, "Emergency Planning and Preparedness for Production and Utilization

Facilities,” which would eliminate the requirements for the licensee to maintain offsite radiological emergency plans in accordance with 44 CFR, “Emergency Management and Assistance,” part 350, “Review and Approval of State and Local Radiological Emergency Plans and Preparedness,” and reduce some of the onsite EP activities based on the reduced risks 10 months after Pilgrim has permanently ceased power operations.

Consistent with 10 CFR 51.21, the NRC has determined that an EA is the appropriate form of environmental review for the requested action. Based on the results of the EA, which is provided in Section II of this document, the NRC has determined not to prepare an environmental impact statement for the proposed action, and is issuing a FONSI.

II. Environmental Assessment

Description of the Proposed Action

The proposed action would exempt the licensee from (1) certain standards as set forth in 10 CFR 50.47(b) regarding onsite and offsite emergency response plans for nuclear power reactors; (2) requirements in 10 CFR 50.47(c)(2) to establish plume exposure and ingestion pathway emergency planning zones (EPZs) for nuclear power reactors; and (3) certain requirements in 10 CFR part 50, appendix E, section IV, which establishes the elements that make up the content of emergency plans. The proposed action of granting these exemptions would eliminate the requirements for the licensee to maintain offsite radiological emergency plans in accordance with 44 CFR part 350 and reduce some of the onsite EP activities at Pilgrim, based on the reduced risks once the reactor has been permanently shut down for a period of 10 months. However, requirements for certain onsite capabilities to communicate and coordinate with offsite response authorities would be retained to an extent consistent with the approved exemptions. Additionally, if necessary, offsite protective actions could still be implemented using a comprehensive emergency management plan (CEMP) process. A CEMP in this context, also referred to as an emergency operations plan (EOP), is addressed in FEMA’s CPG 101, “Developing and Maintaining Emergency Operations Plans.” The CPG 101 is the foundation for State, territorial, tribal, and local EP in the United States under the National Preparedness System. It promotes a common understanding of the fundamentals of risk-informed planning

and decision making, and assists planners at all levels of government in their efforts to develop and maintain viable, all-hazards, all-threats emergency plans. An EOP is flexible enough for use in all emergencies. It describes how people and property will be protected; details who is responsible for carrying out specific actions; identifies the personnel, equipment, facilities, supplies, and other resources available; and outlines how all actions will be coordinated. A CEMP is often referred to as a synonym for “all-hazards” planning. The proposed action is in accordance with the licensee’s application dated July 3, 2018, as supplemented by letters dated November 30 and December 4, 2018, and February 14 and February 18, 2019.

Need for the Proposed Action

The proposed action is needed for the licensee to revise the Pilgrim Emergency Plan once the reactor has been permanently shutdown for a period of 10 months. The EP requirements currently applicable to Pilgrim are for an operating power reactor. Since the certifications for permanent cessation of operations and permanent removal of fuel from the reactor vessel have been docketed, pursuant to 10 CFR 50.82(a)(2), the Pilgrim license no longer authorizes use of the facility for power operation or emplacement or retention of fuel into the reactor vessel and, therefore, the occurrence of postulated accidents associated with reactor operation is no longer credible. However, there are no explicit regulatory provisions distinguishing EP requirements for a power reactor that has been permanently shut down and defueled from those for an operating power reactor.

In its exemption request, the licensee identified four possible radiological accidents at Pilgrim in its permanently shutdown and defueled condition. These are: (1) A fuel-handling accident; (2) a radioactive waste-handling accident; (3) a loss of SFP normal cooling (*i.e.*, boil off); and (4) an adiabatic heat up of the hottest fuel assembly. The NRC staff evaluated these possible radiological accidents in the Commission Paper (SECY) 19–0078, “Request by Entergy Nuclear Operations, Inc. for Exemptions from Certain Emergency Planning Requirements for the Pilgrim Nuclear Power Station,” dated August 9, 2019 (ADAMS Package Accession No. ML18347A717). In SECY–19–0078, the NRC staff verified that the licensee’s analyses and calculations provided reasonable assurance that if the requested exemptions were granted,

then: (1) For a design-basis accident (DBA), an offsite radiological release will not exceed the early phase protective action guides (PAGs) at the site boundary, as detailed in Table 1–1 to the U.S. Environmental Protection Agency’s (EPA’s), “PAG Manual: Protective Action Guides and Planning Guidance for Radiological Incidents,” EPA–400/R–17/001, dated January 2017, and (2) in the highly unlikely event of a beyond DBA resulting in a loss of all SFP cooling, there is sufficient time to initiate appropriate mitigating actions, and in the event a radiological release has or is projected to occur, there would be sufficient time for offsite agencies to take protective actions using a CEMP to protect the health and safety of the public if offsite governmental officials determine that such action is warranted. The Commission approved the NRC staff’s recommendation to grant the exemptions based on this evaluation in its Staff Requirements Memorandum (SRM) to SECY–19–0078, dated November 4, 2019 (ADAMS Accession No. ML19308A034).

Based on these analyses, the licensee states that complete application of the EP rule to Pilgrim 10 months after its permanent cessation of power operations would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule. The licensee also states that it would incur undue costs in the application of operating plant EP requirements for the maintenance of an emergency response organization in excess of that actually needed to respond to the diminished scope of credible accidents for Pilgrim 10 months after its permanent cessation of power operations.

Environmental Impacts of the Proposed Action

The NRC staff has completed its evaluation of the environmental impacts of the proposed action.

The proposed action consists mainly of changes related to the elimination of requirements for the licensee to maintain offsite radiological emergency plans in accordance with 44 CFR part 350 and reduce some of the onsite EP activities at Pilgrim, based on the reduced risks once the reactor has been permanently shutdown for a period of 10 months. However, requirements for certain onsite capabilities to communicate and coordinate with offsite response authorities will be retained and offsite EP provisions to protect public health and safety will still exist through State and local government use of a CEMP.

With regard to potential nonradiological environmental impacts, the proposed action would have no direct impacts on land use or water resources, including terrestrial and aquatic biota, as it involves no new construction or modification of plant operational systems. There would be no changes to the quality or quantity of nonradiological effluents and no changes to the plants' National Pollutant Discharge Elimination System permits would be needed. In addition, there would be no noticeable effect on socioeconomic conditions in the region, no environment justice impacts, no air quality impacts, and no impacts to historic and cultural resources from the proposed action. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

With regard to potential radiological environmental impacts, as stated above, the proposed action would not increase the probability or consequences of radiological accidents. Additionally, the NRC staff has concluded that the proposed action would have no direct radiological environmental impacts. There would be no change to the types or amounts of radioactive effluents that may be released and, therefore, no change in occupational or public radiation exposure from the proposed action. Moreover, no changes would be made to plant buildings or the site property from the proposed action. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered the denial of the proposed action (*i.e.*, the "no-action" alternative). The denial of the application would result in no change in current environmental

impacts. Therefore, the environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

There are no unresolved conflicts concerning alternative uses of available resources under the proposed action.

Agencies or Persons Consulted

No additional agencies or persons were consulted regarding the environmental impact of the proposed action. On November 5, 2019, the Commonwealth of Massachusetts representative was notified of this EA and FONSI.

III. Finding of No Significant Impact

The licensee has proposed exemptions from: (1) Certain standards in 10 CFR 50.47(b) regarding onsite and offsite emergency response plans for nuclear power reactors; (2) requirement in 10 CFR 50.47(c)(2) to establish plume exposure and ingestion pathway EPZs for nuclear power reactors; and (3) certain requirements in 10 CFR part 50, appendix E, section IV, which establishes the elements that make up the content of emergency plans. The proposed action of granting these exemptions would eliminate the requirements for the licensee to maintain offsite radiological emergency plans in accordance with 44 CFR part 350 and reduce some of the onsite EP activities at Pilgrim, based on the reduced risks once the reactor has been permanently shutdown for a period of 10 months. However, requirements for certain onsite capabilities to communicate and coordinate with offsite response authorities will be retained and offsite EP provisions to protect public health and safety will still exist through State and local government use of a CEMP.

The NRC is considering issuing the exemptions. The proposed action would

not significantly affect plant safety, would not have a significant adverse effect on the probability of an accident occurring, and would not have any significant radiological or nonradiological impacts. This FONSI incorporates by reference the EA in Section II of this document. Therefore, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

The related environmental document is the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding Pilgrim Nuclear Power Station, Final Report," NUREG-1437, Supplement 29, Volumes 1 and 2, which provides the latest environmental review of current operations and description of environmental conditions at Pilgrim.

The finding and other related environmental documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. Publicly-available records are accessible electronically from ADAMS Public Electronic Reading Room on the internet at the NRC's website: <https://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC's PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by email to pdr.resource@nrc.gov.

BILLING CODE 7590-01-P

POSTAL REGULATORY COMMISSION

[Docket No. MC2015-8; Order No. 5351]

Market Dominant Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing requesting the removal of Return Receipt for Merchandise Service from the Market Dominant product list. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* January 9, 2020.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Background
- II. Notice of Commission Action
- III. Ordering Paragraphs

On December 10, 2019, the Postal Service filed a renewed request to remove Return Receipt for Merchandise (RRM) service from the Mail Classification Schedule (MCS).¹ For the reasons discussed below, the Commission reopens the docket to consider matters concerning this request.

I. Background

The Postal Service filed its original request to remove the RRM service from the MCS on November 17, 2014.² The Commission approved the request but found that the removal was subject to adjustments to the unused rate adjustment authority for the Special Services class.³ Subsequently, the Postal Service provided notice that it elected to

¹ Renewed Request of the United States Postal Service to Remove Return Receipt for Merchandise and Motion to Reopen Docket, December 10, 2019 (Renewed Request).

² Request of the United States Postal Service to Remove Return Receipt for Merchandise Service from the Mail Classification Schedule, November 17, 2014.

³ Order Conditionally Approving Removal of Return Receipt for Merchandise Service from Mail Classification Schedule, January 15, 2015 (Order No. 2322).

indefinitely defer the removal.⁴ After a series of appeals, the D.C. Circuit issued its opinion on April 6, 2018, vacating the Commission's previous orders on the removal of the RRM service.⁵

On August 29, 2019, the Commission closed Docket Nos. MC2015-8 and MC2015-8R because it had been more than one year since the RRM Opinion and the Postal Service had not indicated a renewed intent to discontinue the RRM service.⁶ The Commission directed the Postal Service to file a request in a new docket if it decided to discontinue RRM service in the future. Order No. 5214 at 3. The Commission also held that it would evaluate any future requests to remove a product from the MCS in light of the RRM Opinion. *Id.*

In its renewed request, the Postal Service asks the Commission to reopen this docket because it contains the record on which the Postal Service relies in renewing its request.⁷ Moreover, the Postal Service seeks expedited review of this request. *Id.* The Postal Service states that the Commission has already held that the removal of the RRM service comports with 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.*, and therefore, no new Section 3642 analysis is necessary. *Id.* In

⁴ Response of the United States Postal Service to Order No. 2322, January 28, 2015.
