Regulatory Agenda

AGENCY: Office of the Secretary, HHS.
ACTION: Semiannual Regulatory Agenda.

SUMMARY: The Regulatory Flexibility Act of 1980 and Executive Order (E.O.) 12866 require the semiannual issuance of an inventory of rulemaking actions under development throughout the Department, offering for public review summarized information about forthcoming regulatory actions.

FOR FURTHER INFORMATION CONTACT: Ann C. Agnew, Executive Secretary, Department of Health and Human Services, 200 Independence Avenue SW, Washington, DC 20201; (202) 690–5627.

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) is the Federal government’s lead Agency for protecting the health of all Americans and providing essential human services, especially for those who are least able to help themselves. HHS enhances the health and well-being of Americans by promoting effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services.

This Agenda presents the regulatory activities that the Department expects to undertake in the foreseeable future to advance this mission. HHS has an agencywide effort to support the Agenda’s purpose of encouraging more

effective public participation in the regulatory process. For example, to encourage public participation, we regularly update our regulatory web page (<http://www.HHS.gov/regulations>), which includes links to HHS rules currently open for public comment, and also provides a “regulations toolkit” with background information on regulations, the commenting process, how public comments influence the development of a rule, and how the public can provide effective comments.

The rulemaking abstracts included in this paper issue of the **Federal Register** cover, as required by the Regulatory Flexibility Act of 1980, those prospective HHS rulemakings likely to have a significant economic impact on a substantial number of small entities. The Department’s complete Regulatory Agenda is accessible online at <http://www.RegInfo.gov>.

Ann C. Agnew,
Executive Secretary to the Department.

Abstract: The final rule would amend the postmarketing safety reporting regulations for human drugs and biological products including blood and blood products in order to better align FDA requirements with guidelines of the International Council on

Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH), and to update reporting requirements in light of current pharmacovigilance practice and safety information sources and enhance the quality of safety reports received by FDA. These revisions were proposed as part of a single rulemaking (68 FR 12406) to clarify and revise both premarketing and postmarketing safety reporting requirements for human drug and biological products. Premarketing safety reporting requirements were finalized in a separate final rule published on September 29, 2010 (75 FR 59961).

Abstract: FDA will be proposing a rule to add the common cold indication to certain over-the-counter (OTC) antihistamine active ingredients. This proposed rule is the result of collaboration under the U.S. Canada Regulatory Cooperation Council as part

of efforts to reduce unnecessary duplication and differences. This pilot exercise will help determine the feasibility of developing an ongoing mechanism for alignment in review and adoption of OTC drug monograph elements.

Legal Authority: 21 U.S.C. 321 *et seq.*; 42 U.S.C. 262; 42 U.S.C. 264; 21 U.S.C. 371

Abstract: The proposed rule would amend FDA medication guide regulations to require a new form of patient labeling, Patient Medication Information, for submission to and review by the FDA for human prescription drug products and certain blood products used, dispensed, or administered on an outpatient basis. The proposed rule would include requirements for Patient Medication Information development and distribution. The proposed rule would require clear and concisely written prescription drug product information presented in a consistent and easily understood format to help patients use their prescription drug products safely and effectively.

235. Testing Standards for Batteries and Battery Management Systems in Battery-Operated Tobacco Products

E.O. 13771 Designation: Regulatory. *Legal Authority:* 21 U.S.C. 301 et. seq.; 21 U.S.C. 371; 21 U.S.C. 387b; 21 U.S.C. 387g; 21 U.S.C. 387i

Abstract: This rule would propose to establish a product standard to require testing standards for batteries used in electronic nicotine delivery systems (ENDS) and require design protections including a battery management system for ENDS using batteries and protective housing for replaceable batteries. This product standard would protect the safety of users of battery-powered tobacco products and will help to streamline the FDA premarket review process, ultimately reducing the burden on both manufacturers and the Agency. The proposed rule would be applicable to tobacco products that include a non-user replaceable battery as well as products that include a user replaceable battery.

Abstract: In the **Federal Register** of June 17, 2015 (80 FR 34650), we published a declaratory order announcing our final determination that there is no longer a consensus among qualified experts that partially hydrogenated oils (PHOs) are generally recognized as safe (GRAS) for any use in human food. In the **Federal Register** of May 21, 2018 (83 FR 23382), we denied a food additive petition requesting that the food additive regulations be amended to provide for the safe use of PHOs in certain food applications. We are now proposing to update our regulations to remove all mention of partially hydrogenated oils from FDA's GRAS regulations and as an optional ingredient in standards of identity. We are also proposing to revoke all prior sanctions for uses of PHOs in food.

Abstract: The final rule will describe the conditions of use under which OTC

sunscreen monograph products are generally recognized as safe and effective (GRASE) and not misbranded. Consistent with the Sunscreen Innovation Act, we expect that these conditions will include sunscreen dosage forms and maximum SPF values. The preamble of the final rule will also indicate which sunscreen active ingredients FDA has deferred further rulemaking on while data supporting the GRASE status of those ingredients is developed.

E.O. 13771 Designation: Fully or Partially Exempt.

Legal Authority: 21 U.S.C. 360ii; 21 U.S.C. 360kk; 21 U.S.C. 393; 21 U.S.C. 371

Abstract: FDA is updating the performance standard for sunlamp

products to improve safety, reflect new scientific information, and work towards harmonization with international standards. By harmonizing with the International Electrotechnical Commission, this rule will decrease the regulatory burden on industry and allow the Agency to take advantage of the expertise of the international committees, thereby also saving resources.

241. Food Labeling; Gluten-Free Labeling of Fermented or Hydrolyzed Foods

E.O. 13771 Designation: Regulatory.

Abstract: This final rule would establish requirements concerning “gluten-free” labeling for foods that are fermented or hydrolyzed or that contain fermented or hydrolyzed ingredients. These additional requirements for the “gluten-free” labeling rule are needed to help ensure that individuals with celiac disease are not misled and receive truthful and accurate information with respect to fermented or hydrolyzed foods labeled as “gluten-free.”

Abstract: FDA is amending its regulations governing mammography. The amendments would update the regulations issued under the Mammography Quality Standards Act of 1992 (MQSA) and the Federal Food, Drug, and Cosmetic Act (FD&C Act). FDA is taking this action to address changes in mammography technology and mammography processes that have occurred since the regulations were published in 1997 and to address breast density reporting to patient and healthcare providers.

243. General and Plastic Surgery Devices: Sunlamp Products

E.O. 13771 Designation: Regulatory.

Legal Authority: 21 U.S.C. 360j(e)
Abstract: This rule will apply device restrictions to sunlamp products. Sunlamp products include ultraviolet

(UV) lamps and UV tanning beds and booths. The incidence of skin cancer, including melanoma, has been increasing, and a large number of skin cancer cases are attributable to the use of sunlamp products. The devices may cause about 400,000 cases of skin cancer per year, and 6,000 of which are melanoma. Beginning use of sunlamp products at young ages, as well as frequently using sunlamp products, both increases the risk of developing skin cancers and other illnesses, and sustaining other injuries. Even infrequent use, particularly at younger ages, can significantly increase these risks. This rule will apply device restrictions to sunlamp products.

E.O. 13771 Designation: Regulatory.

Legal Authority: 15 U.S.C. 1333; 21 U.S.C. 371; 21 U.S.C. 374; 21 U.S.C. 387c; 21 U.S.C. 387e; 21 U.S.C. 387i; Pub. L. 111-31, secs. 201 and 202, 123 Stat. 1776

Abstract: This rule will require color graphics depicting the negative health consequences of smoking to accompany textual warning statements on cigarette packages and in cigarette advertisements. As directed by Congress in the Family Smoking Prevention and Tobacco Control Act, which amends the Federal Cigarette Labeling and Advertising Act, the rule will require these new cigarette health warnings to occupy the top 50 percent of the area of the front and rear panels of cigarette packages and at least 20 percent of the area of cigarette advertisements. The original rule FDA issued in 2011 was vacated by the U.S. Court of Appeals for the District of Columbia Circuit in August 2012 (*R.J. Reynolds Tobacco Co. v. United States Food & Drug Admin.*, 696 F.3d 1205 D.C. Cir. 2012).

245. Milk and Cream Product and Yogurt Products, Final Rule To Revoke the Standards for Lowfat Yogurt and Nonfat Yogurt and To Amend the Standard for Yogurt

E.O. 13771 Designation: Deregulatory.
Legal Authority: 21 U.S.C. 321; 21 U.S.C. 336; 21 U.S.C. 341; 21 U.S.C. 343; 21 U.S.C. 348; 21 U.S.C. 371(e); 21 U.S.C. 379e

Abstract: This final rule amends the standard of identity for yogurt and revokes the standards of identity for lowfat yogurt and nonfat yogurt. It modernizes the standard for yogurt to allow for technological advances, to preserve the basic nature and essential characteristics of yogurt, and to promote honesty and fair dealing in the interest of consumers. Section 701(e)(1), of the Federal Food, Drug, and Cosmetic Act requires that the amendment or repeal of the definition and standard of identity for a dairy product proceed under a formal rulemaking process. Such is consistent with the formal rulemaking provisions of the Administrative Procedures Act (5 U.S.C. 556 and 557). Although, standard practice is not to include formal rulemaking in the Unified Agenda, this rule is included to highlight the de-regulatory work in this space.

E.O. 13771 Designation: Other.
Legal Authority: 21 U.S.C. 334; 21 U.S.C. 371

Abstract: The FDA is proposing regulations to establish requirements for the administrative detention of tobacco products. This action, if finalized, would allow FDA to administratively detain tobacco products encountered during inspections that an officer or

The intent of administrative detention is to protect public health by preventing the distribution or use of violative tobacco products until FDA has had time to consider the appropriate action to take and, where appropriate, to initiate a regulatory action.
