

Guard (see **FOR FURTHER INFORMATION CONTACT**). Documents mentioned in this notice and all public comments, are in our online docket at <http://www.regulations.gov> and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

Do not submit detailed proposals for future CRADAs to the Docket Management Facility. Instead, submit them directly to the Coast Guard (see **FOR FURTHER INFORMATION CONTACT**).

Discussion

CRADAs are authorized under 15 U.S.C. 3710(a).¹ A CRADA promotes the transfer of technology to the private sector for commercial use, as well as specified research or development efforts that are consistent with the mission of the Federal parties to the CRADA. The Federal party or parties agree with one or more non-Federal parties to share research resources, but the Federal party does not contribute funding.

CRADAs are not procurement contracts. Care is taken to ensure that CRADAs are not used to circumvent the contracting process. CRADAs have a specific purpose and should not be confused with procurement contracts, grants, and other type of agreements.

Under the proposed CRADA, the Coast Guard's Research and Development Center (RDC) will collaborate with one or more non-Federal participants. Together, the RDC and the non-Federal participants will evaluate the suitability of WAN optimization technologies in a shipboard environment.

We anticipate that the Coast Guard's contributions under the proposed CRADA will include the following:

- (1) Develop a test plan for execution under the CRADA;
- (2) Provide network access, data, facilities, and approvals required for work under the CRADA;
- (3) Collect and analyze test plan data; and
- (4) Develop a report documenting the methodologies, findings, conclusions, and recommendations related to this CRADA work.

We anticipate that the non-Federal participants' contributions under the proposed CRADA will include the following:

(1) Provide WAN optimization technologies to conduct work to be described in test plan;

(2) Provide required operators and technicians to perform work identified in the test plan;

(3) Provide technical data for the equipment and services to be utilized;

(4) Provide shipment and delivery of any equipment required;

(5) Provide travel and associated personnel and other expenses as required for subject work.

The Coast Guard reserves the right to select for CRADA participants all, some, or no proposals submitted for this CRADA. The Coast Guard will provide no funding for reimbursement of proposal development costs. Proposals and any other material submitted in response to this notice will not be returned. Proposals submitted are expected to be unclassified and have no more than five single-sided pages (excluding cover page, DD 1494, JF-12, etc.). The Coast Guard will select proposals at its sole discretion on the basis of:

(1) How well they communicate an understanding of, and ability to meet, the proposed CRADA's goal; and

(2) How well they address the following criteria:

(a) Technical capability to support the non-Federal party contributions described; and

(b) Resources available for supporting the non-Federal party contributions described.

Currently, the Coast Guard is considering SWISH, for participation in this CRADA. However, we do not wish to exclude other viable participants from this or future similar CRADAs.

This is a technology suitability effort. The goal of this CRADA is to evaluate the suitability of implementing WAN optimization technology in a shipboard environment. Special consideration will be given to small business firms/consortia, and preference will be given to business units located in the U.S.

This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: December 17, 2019.

Captain Gregory C. Rothrock,
Commanding Officer, U.S. Coast Guard
Research and Development Center.
