**Abstract:** EPA tips and complaints web form is intended to provide an easy and convenient means by which members of the public can supply information to EPA regarding suspected violations of environmental law. The decision to provide a tip or complaint is entirely voluntary and use of the webform when supplying a tip or complaint is also entirely voluntary. Tipsters need not supply contact information or other personal identifiers. Those who do supply such information, however, should know that this information may be shared by EPA with appropriate administrative, law enforcement, and judicial entities engaged in investigating or adjudicating the tip or complaint.

**Form Numbers:** None.

**Respondents/affected entities:**

Anyone wishing to file a tip or complaint.

**Respondent's obligation to respond:** Voluntary.

**Estimated number of respondents:** 17,172 (total).

**Frequency of response:** Once.

**Total estimated burden:** 8,586 hours. Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$400,347 (per year), which includes no annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is an increase of 3,443 hours in the total

estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects the fact that tips and complaints are being filed at a higher rate than originally anticipated, a strong indication of the success of this program. There has been no change in the information being reported or the estimated burden per respondent.

**Abstract:** The New Source Performance Standards (NSPS) for Sewage Sludge Treatment Plants (40 CFR part 60, subpart O) were proposed on August 17, 1971, promulgated on December 23, 1971, and amended on: October 6, 1975; November 10, 1977; October 6, 1988; October 17, 2000; and February 27, 2014. These regulations apply to each incinerator which either combusts wastes that contain more than 10 percent sewage sludge (dry basis) produced by municipal sewage treatment plants or each incinerator which charges more than 1,000 kg (2,205 lb) per day municipal sewage sludge (dry basis). New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. These standards set emission limitation for particulate matter (PM). This information is being collected to assure compliance with 40 CFR part 60, subpart O.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/

operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

**Form Numbers:** None.

**Respondents/affected entities:**

Owners or operators of sewage sludge treatment plants.

**Respondent's obligation to respond:**

Mandatory (40 CFR part 60, subpart O).

**Estimated number of respondents:** 86 (total).

**Frequency of response:** Initially, occasionally, and semiannually.

**Total estimated burden:** 9,690 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$4,170,000 (per year), which includes \$3,050,000 in either annualized capital/startup and/or operation & maintenance costs.

**Changes in the Estimates:** There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.
