Abstract: The authority for EPA's oil pollution prevention requirements is derived from section 311(j)(1)(C) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR part 112. An SPCC Plan will help an owner or operator identify the necessary procedures, equipment, and resources to prevent an oil spill and to respond to an oil spill

in a timely manner. If implemented effectively, the SPCC Plan is expected to prevent and reduce the impact and severity, of oil spills. Although the owner or operator is the primary data user, EPA may also require the owner or operator to submit data to the Agency in certain situations to ensure facilities comply with the SPCC regulation and to help allocate response resources. The data, which are not generally available elsewhere, can assist State and local governments in several ways, including when information on certain oil discharges must be sent to relevant State and local agencies (section 112.4(a)), and with local emergency preparedness planning efforts. EPA does not require an owner or operator to submit their SPCC Plan but may request the SPCC Plan during a facility inspection or an oil spill incident for review. The SPCC regulation requires the owner or operator to maintain a complete copy of the Plan at the facility if the facility is normally attended at least four hours per day or at the nearest field office if the facility is not so attended. The rule also requires that the Plan be available to the Regional Administrator for on-site review during normal working hours (40 CFR 112.3(e)).

Form Numbers: None.

Respondents/affected entities:

Owners or operators of facilities that are required to have a SPCC Plan under the Oil Pollution Prevention regulation (40 CFR part 112).

Respondent's obligation to respond: Mandatory, pursuant to 40 CFR 112.3(e).

Estimated number of respondents: 549,785 (total).

Frequency of response: Facilities must prepare and implement an SPCC Plan before beginning operations, and review, evaluate and update the SPCC Plan every five years.

Total estimated burden: 6,309,523 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$857,835,543 (per year), includes \$201,002,128 annualized capital or operation & maintenance costs.

Changes in Estimates: The burden hour estimate presented in this ICR renewal has increased by approximately 130,000 hours from the ICR currently approved by OMB. This increase is attributable to the net change in the universe of regulated facilities after accounting for changes in the numbers of existing and newly regulated facilities in the ICR renewal period.

Annual O&M costs are estimated to increase by approximately \$17,841,833 compared to the costs currently approved by OMB. These increases are due to the combination of the higher
