The original comment period is set to close on January 13, 2020. The extension is based on FHWA's desire to allow interested parties sufficient time to review and provide comprehensive comments on this NPRM. Therefore, the closing date for comments is changed to March 13, 2020, which will provide those interested in commenting additional time to discuss, evaluate, and submit responses to the docket.

DATES: The comment period for the proposed rule published November 12, 2019, at 84 FR 61494, is extended. Comments must be received on or before March 13, 2020.

Background

On November 12, 2019, at 84 FR 61494, FHWA published in the **Federal Register** an NPRM proposing to update the National Bridge Inspection Standards (NBIS). Through this NPRM, FHWA proposes to update the NBIS to address the Moving Ahead for Progress in the 21st Century Act requirements, incorporate technological advancements including the use of unmanned aerial systems, and address ambiguities identified since the last update to the regulation in 2009. The FHWA also proposes to repeal two outdated regulations: The Highway Bridge Replacement and Rehabilitation Program and the Discretionary Bridge Candidate Rating Factor.

The original comment period for the NPRM closes on January 13, 2020. The FHWA believes that this closing date may not provide sufficient time to review and provide comprehensive comments. The extension is in the

public interest based on FHWA's desire to allow interested parties sufficient time to review and provide comprehensive comments on this NPRM. To allow the public to submit comprehensive comments, the closing date is changed from January 13, 2020, to March 13, 2020.

Authority: 23 U.S.C. 119, 144, and 315.

Issued on: January 7, 2020.

Administrator, Federal Highway Administration.

II. What is being addressed in this document?

The EPA is proposing to approve revisions to 10 Code of State Regulation (CSR) 10–6.045, *Open Burning*, in the Missouri SIP. Missouri made several revisions to the rule. These revisions are described in detail in the technical support document (TSD) included in the docket for this action.

Missouri received seventeen comments from five sources during the comment period. EPA provided five comments on the rule. Missouri responded to all seventeen comments, as noted in the state submission included in the docket for this action. Missouri responded to EPA’s comments and, as described in the TSD for this action, amended the rule, in response to some of EPA’s comments.

Therefore, EPA is proposing to approve the revisions to this rule because it will not have a negative impact on air quality.
