Fraser River Sockeye and Pink Salmon Fisheries; Inseason Orders

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason orders.

SUMMARY: NMFS publishes Fraser River salmon inseason orders to regulate treaty and non-treaty (all citizen) commercial salmon fisheries in U.S. waters. The orders were issued by the Fraser River Panel (Panel) of the Pacific Salmon Commission (Commission) and subsequently approved and issued by NMFS during 2019 for sockeye and pink salmon fisheries within the U.S. Fraser River Panel Area. These orders established fishing dates, times, and areas for the gear types of U.S. treaty Indian and all citizen commercial fisheries during the period the Panel exercised jurisdiction over these fisheries.

DATES: The effective dates for the inseason orders are set out in this document under the heading Inseason Orders.

FOR FURTHER INFORMATION CONTACT: Peggy Mundy at 206-526-4323.

SUPPLEMENTARY INFORMATION: The Treaty between the Government of the United States of America and the Government of Canada concerning Pacific salmon was signed at Ottawa on January 28, 1985, and subsequently was given effect in the United States by the Pacific Salmon Treaty Act (Act) at 16 U.S.C. 3631-3644.

Under authority of the Act, Federal regulations at 50 CFR part 300, subpart F, provide a framework for the implementation of certain regulations of the Commission and inseason orders of the Commission's Fraser River Panel for U.S. sockeye and pink salmon fisheries in the Fraser River Panel Area.

The regulations close the U.S. portion of the Fraser River Panel Area to U.S. sockeye and pink salmon tribal and non-tribal commercial fishing unless opened by Panel regulations that are given effect by inseason orders issued by NMFS (50 CFR 300.94(a)(1)). During the fishing season, NMFS may issue inseason orders that establish fishing times and areas consistent with the Commission agreements and regulations of the Panel. Such orders must be consistent with domestic legal obligations and are issued by the Regional Administrator, West Coast Region, NMFS. Official notification of these inseason actions is provided by two telephone hotline numbers described at 50 CFR 300.97(b)(1) and in 84 FR 19729 (May 6, 2019). The inseason orders are published in the **Federal Register** as soon as practicable after they are issued. Due to the frequency with which inseason orders are issued, publication of individual orders is impractical.

Inseason Orders

The Panel assumed regulatory control of Fraser River Panel Area waters on June 30, 2019. The following inseason orders were adopted by the Panel and issued for U.S. fisheries within Fraser River Panel Area waters by NMFS during the 2019 fishing season. Each of the following inseason actions was effective upon announcement on telephone hotline numbers as specified at 50 CFR 300.97(b)(1) and in 84 FR 19729 (May 6, 2019); those dates and times are listed herein. The times listed are local times, and the areas designated are Puget Sound Management and Catch Reporting Areas as defined in the Washington State Administrative Code at Chapter 220-22, with the exception of the Apex, which is those waters north and west of the Area 7A "East Point Line," defined as a line projected from the low water range marker in Boundary Bay on the International Boundary through the east tip of Point Roberts in

the State of Washington to the East Point Light on Saturna Island in the Province of British Columbia.

Classification

The Assistant Administrator for Fisheries NOAA (AA), finds that good cause exists for the inseason orders to be issued without affording the public prior notice and opportunity for comment under 5 U.S.C. 553(b)(B) as such prior notice and opportunity for comments is impracticable and contrary to the public interest. Prior notice and opportunity for public comment is impracticable because NMFS has insufficient time to allow for prior notice and opportunity for public comment between the time the stock abundance information is available to determine how much fishing can be allowed and the time the fishery must open and close in order to harvest the appropriate amount of fish while they are available.

The AA also finds good cause to waive the 30-day delay in the effective date, required under 5 U.S.C. 553(d)(3), of the inseason orders. A delay in the effective date of the inseason orders would not allow fishers appropriately controlled access to the available fish at that time they are available.

This action is authorized by 50 CFR 300.97, and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 3636(b).

Dated: January 2, 2020.
