DEPARTMENT OF COMMERCE**Census Bureau****Submission for OMB Review; Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

Agency: U.S. Census Bureau.
Title: Monthly Wholesale Trade Survey.

OMB Control Number: 0607-0190.
Form Number(s): SM4217-A, SM4217-E.

Type of Request: Extension of a currently approved collection.

Number of Respondents: 4,200.
Average Hours per Response: 7 minutes.

Burden Hours: 5,880.

Needs and Uses: The U.S. Census Bureau requests a three-year extension of the Monthly Wholesale Trade Survey (MWTS). The MWTS canvasses firms primarily engaged in merchant wholesale trade that are located in the United States, excluding manufacturers' sales branches and offices (MSBOs). This survey provides the only continuous measure of monthly wholesale sales, end-of-month inventories, and inventories-to-sales ratios. The sales and inventories estimates produced from the MWTS provide current trends of economic

activity by kind of business for the United States. Also, the estimates compiled from this survey provide valuable information for economic policy decisions by the government and are widely used by private businesses, trade organizations, professional associations, and other business research and analysis organizations.

Estimates from the MWTS are released in three different reports each month. High level aggregate estimates for end-of-month inventories are first released as part of the Advance Economic Indicators Report. Second, the full Monthly Wholesale Trade Report containing both sales and inventories estimates is released. Lastly, high level sales and inventories estimates from the MWTS are also released as part of the Manufacturing and Trade Inventories and Sales (MTIS) report.

As one of the Census Bureau's principal economic indicators, the estimates produced by the MWTS are critical to the accurate measurement of total economic activity of the United States. The estimates of sales made by wholesale locations represent only merchant wholesalers, excluding MSBOs, who typically take title to goods bought for resale and sell to other businesses. The sales estimates include sales made on credit as well as on a cash basis, but exclude receipts from sales taxes and interest charges from credit sales.

The estimates of inventories represent all merchandise held in wholesale locations, warehouses, and offices, as well as goods held by others for sale on consignment or in transit for distribution to wholesale establishments. The estimates of inventories exclude fixtures and supplies not for resale, as well as merchandise held on consignment, which are owned by others. Inventories are an important component in the Bureau of Economic Analysis' (BEA) calculation of the investment portion of the Gross Domestic Product (GDP).

The Census Bureau publishes wholesale sales and inventories estimates based on the North American Industry Classification System (NAICS), which has been widely adopted throughout both the public and private sectors.

The Census Bureau tabulates the collected data to provide, with measurable reliability, statistics on sales, end-of-month inventories, and inventories-to-sales ratios for merchant wholesalers, excluding MSBOs.

The BEA is the primary Federal user of data collected in the MWTS. The BEA uses estimates from this survey to

prepare the national income and product accounts (NIPA), input-output accounts (I-O), and gross domestic product (GDP) by industry. End-of-month inventories are used to prepare the change in private inventories component of GDP. The BEA also uses the Advance Economic Indicators Report to improve the inventory valuation adjustments applied to estimates of the Advance Gross Domestic Product. Sales are used to prepare estimates of real inventories-to-sales ratios in the NIPAs, extrapolate proprietors' income for wholesalers (until tax return data become available) in the NIPAs, and extrapolate annual current-dollar gross output for the most recent year in annual I-O tables, GDP-by-industry, and advance GDP-by-industry estimates.

The Bureau of Labor Statistics uses the data as input to its Producer Price Indexes and in developing productivity measurements. Private businesses use the wholesale sales and inventories data in computing business activity indexes. Other government agencies and businesses use this information for market research, product development, and business planning to gauge the current trends of the economy.

Affected Public: Business and other for-profit.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Sections 131 and 182.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.
