Abstract: The New Source Performance Standards (NSPS) for Rubber Tire Manufacturing (40 CFR part 60, subpart BBB) apply to existing and new facilities with the following processes: Undertread cementing operations, sidewall cementing operations, tread end cementing operations, bead cementing operations, green tire spraying operations, Michelin-A operations, Michelin-B operations, and Michelin-C automatic operations. Affected facilities include those that commenced construction, modification, or reconstruction after January 20, 1983. This information is being collected to assure compliance with 40 CFR part 60, subpart BBB.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Owners or operators of the rubber tire manufacturing industry.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart BBB).

Estimated number of respondents: 41 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 17,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,070,000 (per year), includes \$16,400 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

Integrated Science Assessment for Particulate Matter

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of a final document titled, “Integrated Science Assessment for Particulate Matter” (EPA/600/R–19/188). The document was prepared by

the Center for Public Health and Environmental Assessment (CPHEA) within EPA's Office of Research and Development (ORD) as part of the review of the primary (health-based) and secondary (welfare-based) National Ambient Air Quality Standards (NAAQS) for particulate matter (PM) and represents an update of the 2009 Integrated Science Assessment (ISA) for PM. The welfare-based effects evaluated consist of non-ecological effects, specifically visibility impairment, climate effects, and effects on materials. The ISA provides the scientific basis for EPA's decisions, in conjunction with additional technical and policy assessments, on the adequacy of the current NAAQS and the appropriateness of possible alternative standards. EPA is currently developing a separate ISA to support the secondary NAAQS review for ecological effects for oxides of nitrogen, oxides of sulfur, and particulate matter.

DATES: The document is available on or about January 6, 2020.

ADDRESSES: The “Integrated Science Assessment for Particulate Matter (Final)” will be available primarily via the internet on EPA's Integrated Science Assessment Particulate Matter page at <https://www.epa.gov/isa/integrated-science-assessment-isa-particulate-matter> or the public docket at <http://www.regulations.gov>, Docket ID: EPA–HQ–ORD–2014–0859. A limited number of CD-ROM copies will be available. Contact Ms. Marieka Boyd by phone: 919–541–0031; fax: 919–541–5078; or email: boyd.marieka@epa.gov to request a CD-ROM, and please provide your name, your mailing address, and the document title, “Integrated Science Assessment for Particulate Matter” to facilitate processing of your request.

FOR FURTHER INFORMATION CONTACT: For technical information, contact Mr. Jason Sacks, CPHEA; phone: 919–541–9729; fax: 919–541–1818; or email: sacks.jason@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

Section 108(a) of the Clean Air Act directs the Administrator to identify certain pollutants which, among other things, “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare” and to issue air quality criteria for them. These air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air . . .” Under
