

information through telephone interviews, questionnaires, or web-based surveys. The estimated average burden per response may vary from 20–60 minutes, with an average of 30 minutes. Information to be collected includes respondents' perspectives regarding needs, values, and barriers relevant to developing potential solutions.

CDC expects that teams participating in the I-Catalyst process and OTI consultations will be empowered to implement innovative strategies and solutions that create value for their stakeholders. The ultimate goal is to provide CDC staff with real-world, hands-on training and the skills needed to create value-based solutions that benefit society and broaden the agency's impact.

In this Revision request, CDC seeks approval for minor changes to the I-Catalyst generic clearance. (1) The total number of respondents and burden hours will decrease based on participation in the I-Catalyst process during the period 2017–2019. Project-specific estimates will be included with each submission under the I-Catalyst generic clearance. (2) CDC/ATSDR programs may request OTI approval to use the I-Catalyst generic if (a) program representatives completed relevant OTI training in 2017–2019, (b) program representatives participate in relevant OTI training or mentored technical assistance in 2020–2022, or (c) OTI determines that project goals and methodology are consistent with the I-Catalyst process. These changes will allow OTI to make the OMB approval process easier for a broader pool of

qualified customer discovery projects. (3) The title of the clearance is being updated to reflect its use by additional CDC/ATSDR project teams approved by OTI.

The I-Catalyst clearance will continue to be used for information collections necessary to explore the needs and preferences of specific stakeholder groups, and to improve the impact of CDC products, programs, and technologies. All projects submitted to OMB for approval under the I-Catalyst generic clearance will be consistent with CDC/OTI goals for promoting scientific innovation and customer engagement in public health.

OMB approval is requested for three years. Participation is voluntary and there are no costs to respondents other than their time. The total estimated annualized burden hours are 250.

This assessment is coupled with the state's results in attaining the participation goals set for the state. In the event that the state changes something in the state plan, only the affected page must be updated. *Form Number:* CMS-10227 (OMB control number: 0938-1027); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 7; *Total Annual Responses:* 2; *Total Annual Hours:* 140.
