Total Annual Burden: 2,869 hours.

Total Annual Cost: \$82,285.

Privacy Impact Assessment: There are no impacts under the Privacy Act.

Nature and Extent of Confidentiality: No known confidentiality between third parties.

Needs and Uses: The Commission will submit this information collection for approval after the comment period to obtain the full three-year clearance from the Office of Management and Budget (OMB). The Commission is requesting OMB approval for disclosure requirements pertaining to the First Amendment to Nationwide Programmatic Agreement for the Collocation of Wireless Antennas (First Amendment) to address the review of deployments of small wireless antennas and associated equipment under Section 106 of the National Historic Preservation Act (NHPA) (54 U.S.C. 306108 (formerly codified at 16 U.S.C. 470f). The FCC, the Advisory Council on Historic Preservation (Council), and the National Conference of State Historic Preservation Officers (NCSHPO) amended the Nationwide Programmatic Agreement for the Collocation of Wireless Antennas (Collocation Agreement) to account for the limited potential of small wireless antennas and associated equipment, including Distributed Antenna Systems (DAS) and small cell facilities, to affect historic properties. The Collocation Agreement addresses historic preservation review for collocations on existing towers, buildings, and other non-tower structures. Under the Collocation Agreement, most antenna collocations on existing structures are

excluded from Section 106 historic preservation review, with a few exceptions defined to address potentially problematic situations. On August 3, 2016, the Commission's Wireless Telecommunications Bureau, ACHP, and NCSHPO finalized and executed the First Amendment to the Collocation Agreement, to tailor the Section 106 process for small wireless deployments by excluding deployments that have minimal potential for adverse effects on historic properties.

The following are the information collection requirements in connection with the amended provisions of Appendix B of Part 1 of the Commission's rules (47 CFR pt.1, App. B):

- Stipulation VII.C of the amended Collocation Agreement provides that proposals to mount a small antenna on a traffic control structure (*i.e.*, traffic light) or on a light pole, lamp post or other structure whose primary purpose is to provide public lighting, where the structure is located inside or within 250 feet of the boundary of a historic district, are generally subject to review through the Section 106 process. These proposed collocations will be excluded from such review on a case-by-case basis, if (1) the collocation licensee or the owner of the structure has not received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties; and (2) the structure is not historic (not a designated National Historic Landmark or a property listed in or eligible for listing in the National Register of Historic Places) or considered a contributing or compatible element within the historic district, under certain procedures. These procedures require that applicant must request in writing that the SHPO concur with the applicant's determination that the structure is not a contributing or compatible element within the historic district, and the applicant's written request must specify the traffic control structure, light pole, or lamp post on which the applicant proposes to collocate and explain why the structure is not a contributing element based on the age and type of structure, as well as other relevant factors. The SHPO has thirty days from its receipt of such written notice to inform the applicant whether it disagrees with the applicant's determination that the structure is not a contributing or compatible element within the historic district. If within the thirty-day period, the SHPO informs the applicant that the structure is a

contributing element or compatible element within the historic district or that the applicant has not provided sufficient information for a determination, the applicant may not deploy its facilities on that structure without completing the Section 106 review process. If, within the thirty day period, the SHPO either informs the applicant that the structure is not a contributing or compatible element within the historic district, or the SHPO fails to respond to the applicant within the thirty-day period, the applicant has no further Section 106 review obligations, provided that the collocation meets the certain volumetric and ground disturbance provisions.

The First Amendment to the Collocation Agreement established new exclusions from the Section 106 review process for physically small deployments like DAS and small cells, fulfilling a directive in the Commission's *Infrastructure Report and Order*, 80 FR 1238, Jan. 8, 2015, to further streamline review of these installations. These exclusions will continue to reduce the cost, time, and burden associated with deploying small facilities in many settings and provide opportunities to increase densification at low cost and with very little impact on historic properties.

Facilitating these deployments thus directly advances efforts to roll out 5G service in communities across the country.
