The form contains information required by medical institutions and private physicians to enable them to release pertinent medical information.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of a continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

This ICR is based on the 2017 final rule for Beryllium which includes general industry, construction, and maritime. Subsequently, the agency has proposed revisions to the beryllium standards. OSHA proposed revisions to the beryllium general industry standard in December 2018 (83 FR 63746) titled "Occupational Exposure to Beryllium in General Industry," and to the beryllium construction and shipyard standards in October 2019 (84 FR 53902) titled "Occupational Exposure to Beryllium in Construction and Shipyard Sectors." The agency is planning to finalize the beryllium standards in two separate rulemakings in the coming months. The modification and update of these beryllium standards will clarify the provisions contained in the 2017 general industry standard and will better tailor the construction and shipyard standards to address the particular operations in these sectors involving exposure to beryllium. These two Beryllium final rules contain information collection requirements that will have an impact on this ICR when they are published.

The information collection requirements specified by the beryllium standards for general industry, construction, and maritime standards help protect workers from harmful elements when exposed to permissible exposure limits of beryllium and
