National Institute on Minority Health and Health Disparities; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Council on Minority Health and Health Disparities.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning

individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council on Minority Health and Health Disparities Special Emphasis Panel for Review of Conference Grant (R13) Applications.

Date: March 24, 2020.

Time: 1:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Gateway Plaza, 7201 Wisconsin Avenue, Bethesda, MD 20817 (Telephone Conference Call).

Contact Person: Deborah Ismond, Ph.D., Scientific Review Officer, Division of Scientific Programs, NIMHD, National Institutes of Health, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892, (301) 402-1366, ismond@nih.gov.

Dated: January 30, 2020.

Miguelina Perez,

Program Analyst, Office of Federal Advisory Committee Policy.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer at (240) 276-0361.

Project: "Talk. They Hear You." Campaign Evaluation: Case Study (OMB No. 0930-0373)—Extension

The SAMHSA Center for Substance Abuse Prevention (CSAP) is requesting approval from the Office of Management and Budget (OMB) for a replicated data collection, "Talk. They Hear You." Campaign Evaluation: Case Study (the "case study"). This collection includes three instruments:

1. Parent/Caregiver Pre-test/Post-test Survey
2. Youth Pre-test and Post-test Survey
3. Parent/Caregiver Interview Guide

The case study collection is part of a larger effort to evaluate the impact of the "Talk. They Hear You." campaign. This

evaluation will help determine the extent to which the campaign has been successful in educating parents and caregivers nationwide about effective methods for reducing underage drinking. The campaign is designed to educate and empower parents and caregivers to talk with their children about alcohol and other substances. To prevent initiation of underage drinking and substance use, the campaign targets parents and caregivers of children aged 9-20, with the following specific aims:

1. Increasing parents' awareness of the prevalence and risk of underage drinking and substance use;
2. Equipping parents with the knowledge, skills, and confidence to prevent underage drinking and substance use; and
3. Increasing parents' actions to prevent underage drinking and substance use.

For this evaluation, SAMHSA intends to measure knowledge and attitudes before and after a focused campaign outreach effort in areas that have not previously had significant exposure to the campaign. Participants in the evaluation will be recruited from a middle school community and will include parents/caregivers and students. School administrators and partnering organization(s), such as parent/caregiver organizations and/or local educational partner organizations, will assist in the dissemination of campaign materials and data collection efforts. There will be two sites selected for the case study—one site will serve as the experimental group and the other site will serve as the control group. The experimental group will be exposed to the "Talk. They Hear You." messages using standard campaign materials and dissemination strategies, which will be coordinated through the school and potentially a local partner organization. The control group will not be intentionally exposed to the campaign materials. The case study will include baseline surveys of parents/caregivers and children of middle school age in both the experimental and control communities, followed by exposure to campaign materials in the experimental community, and post-exposure surveys of parents/caregivers and children in both communities. Additionally, SAMHSA will conduct 30 interviews with parents and caregivers following the post-exposure surveys at the experimental site to obtain more detailed information about the specific impact of the campaign.
