 The National Institute of General  
 Medical Sciences (NIGMS), National  
 Institutes of Health, may not conduct or  
 sponsor, and the respondent is not  
 required to respond to, an information  
 collection that has been extended,

In compliance with Section  
 3507(a)(1)(D) of the Paperwork  
 Reduction Act of 1995, the National  
 Institutes of Health (NIH) has submitted  
 to the Office of Management and Budget  
 (OMB) a request for review and  
 approval of the information collection  
 listed below.

*Proposed Collection:* Evaluation of the  
 Enhancing the Diversity of the NIH-  
 funded Workforce Program Consortium  
 (DPC), 0925-0747-Reinstatement with  
 Change, exp., date 11/30/2019, National  
 Institute of General Medical Sciences  
 (NIGMS), National Institutes of Health  
 (NIH).

*Need and Use of Information  
 Collection:* The goal of the DPC is to  
 address a unique and compelling need  
 identified by NIH, namely to enhance  
 the diversity of well-trained biomedical  
 research scientists who can successfully  
 compete for NIH research funding and/  
 or otherwise contribute to the NIH-  
 funded scientific workforce. The DPC is  
 a national collaborative through which  
 awardee institutions, in partnership  
 with NIH, aim to enhance diversity in  
 the biomedical research workforce  
 through the development,  
 implementation, assessment and  
 dissemination of innovative and  
 effective approaches to: (a) Student  
 outreach, engagement, training, and  
 mentoring, (b) faculty development, and  
 (c) institutional research training  
 infrastructure. The Coordination and  
 Evaluation Center (CEC) will evaluate  
 the efficacy of the training and  
 mentoring approaches implemented  
 across a variety of contexts and  
 populations and will disseminate  
 information to the broader research  
 community. The planned consortium-  
 wide data collection and evaluation will  
 provide comprehensive information  
 about the multi-dimensional factors  
 (individual, institutional, and faculty/  
 mentor) that influence student and  
 faculty success, professional  
 development, and persistence within  
 biomedical research career paths across  
 a variety of contexts. The planned data  
 collection, and the resulting findings, is  
 projected to have a sustained,  
 transformative effect on biomedical  
 research training and mentoring  
 nationwide.

OMB approval is requested for 3  
 years. There are no costs to respondents  
 other than their time. The total  
 estimated annualized burden hours are  
 55,132.
