

existing IHA (84 FR 24490; May 28, 2019). The total number of harbor seals that is authorized to be taken has not changed. Based on the analysis contained herein of the proposed activity (including the prescribed mitigation and monitoring measures) and the anticipated take of marine mammals, NMFS finds that small numbers of harbor seal will be taken relative to the population size of the affected species or stocks.

Based on the information contained here and in the referenced documents, NMFS has preliminarily determined the following: (1) The required mitigation measures will affect the least practicable impact on marine mammal species or stocks and their habitat; (2) the proposed authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the proposed authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) CBJ's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act (ESA)

No incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action (*i.e.*, the issuance of an incidental harassment authorization) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental harassment authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS determined that the issuance of the original IHA qualified to be categorically excluded from further NEPA review.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to issue a modified IHA to CBJ for conducting downtown waterfront improvement project in Juneau, Alaska, to replace the existing IHA, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. The modified IHA would remain valid through July 14, 2020. A draft of the proposed modified IHA can be found at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>.

Request for Public Comments

We request comment on our proposed modification, and any other aspect of this Notice of Proposed Modification for the CBJ waterfront improvement project. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization.
