

Public reporting burden for this split panel test is estimated to average 7.3 minutes (after rounding) for each household that responds to the labor force portion of the CPS. The estimate is based on the average proportion of respondents that were asked each question in recent survey years and typical reading and response times for the questions. The estimate assumes an 80 percent response rate to the supplement. Based on these estimates, ERS intends to request a one-time only additional 39,000 respondents and 4,729 hours of response burden for conducting the aforementioned split panel test during its testing year. Copies of this information collection can be obtained from Alisha Coleman-Jensen at the address in the preamble.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments should be sent to the address in the preamble. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
