Title: Quality Control Review Schedule (FNS 380)

OMB Control Number: 0584–0074

Summary of Collection: Section 16 of the Food and Nutrition Act of 2008 provides the legislative basis for the operation of the Quality Control (QC) system. Part 275, Subpart C, of SNAP regulations implements the legislative mandates found in Section 16. Regulations at 7 CFR 275.1, 275.14(d) and 275.21(a) and (b)(1) provide the regulatory basis for the QC reporting requirements. Section 11(a) of the Food and Nutrition Act of 2008 provides the legislative basis for the recordkeeping requirements. SNAP regulations, at 7 CFR 272.1(f), specify that program records must be retained for three years from the month of origin. Regulations at 7 CFR 275.4 specifically address record retention requirements for form FNS–380.

State agencies are required to perform Quality Control (QC) reviews for the Supplemental Nutrition Assistance Program (SNAP). In order to determine the accuracy of SNAP benefits authorized by State agencies, a statistical sample of SNAP cases is selected for review from each State agency. Relevant information from the case record, investigative work and documentation about individual cases is recorded on the form FNS–380, Worksheet for SNAP Quality Control Reviews.

The purpose is for State agencies to analyze each household case record including planning and carrying out the field investigation; gathering, comparing, analyzing and evaluating the review of data and forwarding selected cases to the Food and Nutrition Service for Federal validation, for the entire caseload.

Need and Use of the Information: Form FNS–380, is a SNAP worksheet used to determine eligibility and benefits for households selected for review in the quality control sample of active cases and to ensure program integrity. FNS will produce a report of our findings.

SUPPLEMENTARY INFORMATION:

Title: Advanced Meat Recovery.
OMB Number: 0583–0130.
Expiration Date of Approval: 5/31/2020.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18 and 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*). This statute mandates that FSIS protect the public by verifying that meat products are safe, wholesome, unadulterated, and properly labeled and packaged.

FSIS is announcing its intention to request renewal of the approved information collection regarding the regulatory requirements associated with the production of meat from advanced meat recovery systems. There are no changes to the existing information collection. The approval for this information collection will expire on May 31, 2020.

The regulations at 9 CFR 318.24 state that meat, as defined in 9 CFR 301.2, may be derived by mechanically separating skeletal muscle tissue from the bones of livestock, other than skulls or vertebral column bones of cattle 30 months of age and older as provided in 9 CFR 310.22, using advances in mechanical meat/bone separation machinery (*i.e.*, AMR systems) that, recover meat (1) without significant incorporation of bone solids or bone marrow as measured by the presence of calcium and iron in excess of the requirements in this section, and (2) without the presence of any brain, trigeminal ganglia, spinal cord, or dorsal root ganglia. As a prerequisite to

labeling or using AMR product, establishments are to develop, implement, and maintain written procedures that ensure that the establishment's production process is in control, which includes testing for calcium, iron, spinal cord, and dorsal root ganglia, documenting testing protocols, handling product in a manner that does not cause product to be misbranded or adulterated, and maintaining records on a daily basis sufficient to document the implementation and verification of its production process.

FSIS has made the following estimates based upon an information collection assessment:

Estimate of Burden: FSIS estimates that it will take respondents an average of a half hour per response.

Respondents: Official establishments that produce meat from AMR systems.

Estimated No. of Respondents: 47.

Estimated No. of Annual Responses per Respondent: 900.

Estimated Total Annual Burden on Respondents: 21,159 hours.

Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Room 6065, South Building, Washington, DC 20250–3700; (202) 720–5627.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of FSIS's functions, including whether the information will have practical utility; (b) the accuracy of FSIS's estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.
