

SMCRA and its implementing regulations.

Pennsylvania proposed this amendment to address situations where the underground mines or coal preparation plants that produce coal refuse cease operations for longer than a year. In such situations, the sources of the coal refuse has no time limit on the cessation of operations, but the coal refuse disposal area has a time limit of one year or less. This has created operational problems for the coal refuse disposal sites.

Pursuant to OMB guidance, dated October 12, 1993, the approval of State program amendments is exempted from OMB review under Executive Order 12866. Executive Order 13563, which reaffirms and supplements Executive Order 12866, retains this exemption.

Other Laws and Executive Orders Affecting Rulemaking

When a State submits a program amendment to OSMRE for review, our

regulations at 30 CFR 732.17(h) require us to publish a notice in the **Federal Register** indicating receipt of the proposed amendment, its text or a summary of its terms, and an opportunity for public comment. We conclude our review of the proposed amendment after the close of the public comment period and determine whether the amendment should be approved, approved in part, or not approved. At that time, we will also make the determinations and certifications required by the various laws and executive orders governing the rulemaking process and include them in the final rule.

I. Background on the Pennsylvania Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its approved, State program includes, among other things, State laws and regulations that govern surface coal mining and reclamation operations in accordance with the Act and consistent with the Federal regulations. See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Pennsylvania program on July 30, 1982. You can find background information on the Pennsylvania program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Pennsylvania program in the July 30, 1982, **Federal Register** (47 FR 33050). You can also find later actions concerning the Pennsylvania program and program amendments at 30 CFR 938.11, 938.12, 938.13, 938.15, and 938.16.

II. Description of the Proposed Amendment

By letter dated July 5, 2018, (Administrative Record No. PA 902.00), Pennsylvania sent us an amendment to its program under SMCRA (30 U.S.C. 1201 *et seq.*).

The proposed amendment includes changes to the Pennsylvania regulatory program regulations that were adopted by the Commonwealth on February 20, 2018, and became effective on June 23, 2018. Chapters 210 and 211, relating to blasters' licenses; and storage, handling and use of explosives, were revised. The proposed amendments update the regulations based on current industry best practices and include blasting requirements related to seismic exploration, which is fundamentally different than most other uses of explosives. This proposed rule also updates explosives use requirements to reflect current practices and eliminates outdated requirements. The updated requirements may result in more consistency between the requirements

for construction blasting and blasting for mining operations.

The full text of the program amendment is available for you to read at the locations listed above under **ADDRESSES** or at www.regulations.gov.

III. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking your comments on whether the amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the State program.

We cannot ensure that comments received after the close of the comment period (see **DATES**) or sent to an address other than those listed (see **ADDRESSES**) will be included in the docket for this rulemaking and considered.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information, may be made publicly available at any time.
