

considerations like those included in Alternative 4 (e.g., multi-well pads and less disturbance), as well as providing the Companies flexibility to use, treat, and dispose of water in response to changing technology and economic conditions like Alternative 4. However, the Preferred Alternative includes additional measures to prioritize water management in an effort to minimize impacts to BLM protected resources resulting from surface water discharge. The maximum number of wells would be the same as Alternative 4 and the Preferred Alternative would also include an amendment to the Casper RMP to increase protection measures for the Cedar Ridge TCP, but the Preferred Alternative would differ from Alternative 4 by encouraging the Companies to utilize the pipeline option rather than surface discharge. In addition, the Companies would be required to submit a conservation plan prior to approval of additional surface discharge point locations.

All alternatives conform to the provisions of the Lander RMP Record of Decision (2014), Casper RMP Record of Decision (2007) and Rawlins RMP Record of Decision (2008), as amended.

Treatment and disposal of produced water would be in compliance with State of Wyoming permit(s) including all protections against degradation of public lands. All alternatives require that interim and final reclamation activities would be implemented to return the landscape to proper biological and ecological function in conformance with the Moneta Divide Reclamation Plan and the relevant RMPs.

The Draft EIS was published April 19, 2019, with the publication in the **Federal Register** of the Notice of Availability of the Draft EIS and a possible land use plan amendment to the Casper RMP (84 FR 16532). Comments on the Draft EIS and Draft Land Use Plan Amendment received from the public and internal agency review were considered and incorporated as appropriate into the proposed plan amendment. Public comments resulted in the addition of clarifying text, but did not significantly change proposed land use plan decisions. A response to substantive comments is included in the Final EIS and Proposed Land Use Plan Amendment.

Instructions for filing a protest with the Director of the BLM regarding the Proposed Land Use Plan Amendment/ Final EIS may be found in the "Dear Reader" Letter of the Final EIS and Proposed Land Use Plan Amendment and at 43 CFR 1610.5–2. All protests

must be in writing and mailed to the appropriate address, as set forth in the **ADDRESSES** section above. Emailed protests will not be accepted as valid protests unless the protesting party also provides the original letter by either regular mail or overnight delivery postmarked by the close of the protest period. Under these conditions, the BLM will consider the email as an advanced copy, and it will receive full consideration. If you wish to provide the BLM with such advance notification, please direct emails to: protest@blm.gov.

SUPPLEMENTAL INFORMATION: Greater Sage-Grouse is a State-managed species that is dependent on sagebrush steppe ecosystems. These ecosystems are managed in partnership across the range of the Greater Sage-Grouse by State wildlife agencies, Federal agencies, local communities, private landowners, and other stakeholders. Since the 1950s these partners have collaborated to conserve Greater Sage-Grouse and its habitats. The U.S. Department of the Interior and the BLM have broad responsibilities to manage Federal lands and resources for the public benefit. Nearly half of Greater Sage-Grouse habitat is managed by the BLM. The BLM is committed to being a good neighbor and investing in on-the-ground conservation activities through close collaboration with State governments, local communities, private landowners, and other stakeholders.

In 2019 the BLM Wyoming State Director signed the Record of Decision and Approved Wyoming Greater Sage-Grouse Resource Plan Amendment (84 FR 10322) building upon the BLM's commitment to conserve and restore Greater Sage-Grouse habitat while improving collaboration and alignment with State management strategies for Greater Sage-Grouse. The BLM sought to improve management alignment in ways

that would increase management flexibility, maintain access to public resources, and promote conservation outcomes.

The Draft Supplemental EIS will supplement and clarify the analysis relied on in the 2019 BLM Wyoming Record of Decision, including with respect to the BLM considering a range of reasonable alternatives, taking a “hard look” at environmental effects, and evaluating cumulative impacts. Through the Draft Supplemental EIS, the BLM will also allow for additional public comment on the BLM’s approach to compensatory mitigation and Greater Sage-Grouse habitat conservation.

The Wyoming planning area analyzed in this Draft Supplemental EIS includes nearly 60 million acres of BLM, National Park Service, U.S. Forest Service, U.S. Bureau of Reclamation, State, local, and private lands located in Wyoming, in 20 counties: Albany, Bighorn, Campbell, Carbon, Converse, Crook, Fremont, Hot Springs, Johnson, Lincoln, Natrona, Niobrara, Park, Sheridan, Sublette, Sweetwater, Teton, Uinta, Washakie, and Weston. Also analyzed are the cumulative effects across the Western Association of Fish and Wildlife Agencies’ Management Zone and entire Greater Sage-Grouse range. Within the decision area, the BLM administers more than 18 million acres of public lands, providing approximately 17 million acres of Priority and General Greater Sage-Grouse habitat.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
