

information collection regarding Sanitation Standard Operating Procedures (Sanitation SOPs), pathogen testing, and Hazard Analysis and Critical Control Point (HACCP) Systems requirements. There are no changes to the existing information collection. The approval for this information collection will expire on May 31, 2020.

FSIS has established requirements applicable to meat and poultry establishments designed to reduce the occurrence and numbers of pathogenic microorganisms on meat and poultry products, reduce the incidence of foodborne illness associated with the consumption of those products, and provide a framework for modernization of the meat and poultry inspection system. The regulations (1) require that each establishment develop, implement, and revise, as needed, written Sanitation SOPs (9 CFR part 416); (2) require regular microbial testing for generic *Escherichia coli* by livestock establishments (except swine which are sampled under 9 CFR 310.18) to verify the adequacy of the establishment's process controls for the prevention and removal of fecal contamination and associated bacteria (9 CFR 310.25(a)); and (3) require that all meat and poultry establishments develop and implement a system of preventive controls designed to improve the safety of their products, known as HACCP (9 CFR part 417).

Establishments may have programs that are prerequisite to HACCP that are designed to provide the basic environmental and operating conditions necessary for the production of safe, wholesome food. Because of its prerequisite programs, an establishment may decide that a food safety hazard is not reasonably likely to occur in its operations. The establishment would need to document this determination in its Hazard Analysis and include the procedures it employs to ensure that the program is working and that the hazard is not likely to occur (9 CFR 417.5 (a)(1)).

To the extent feasible, the information sought by USDA can be transmitted electronically using the website <http://www.biopreferred.gov>. If electronic transmission of information is not practical for some applicants, USDA will provide technical assistance to support the transmission of information to USDA.
